Zen at War Brian Daizen Victoria, 2006-06-22 A compelling history of the contradictory often militaristic role of Zen Buddhism this book meticulously documents the close and previously unknown support of a supposedly peaceful

religion for Japanese militarism throughout World War II Drawing on the writings and speeches of leading Zen masters and scholars Brian Victoria shows that Zen served as a powerful foundation for the fanatical and suicidal spirit displayed by the imperial Japanese military At the same time the author recounts the dramatic and tragic stories of the handful of Buddhist organizations and individuals that dared to oppose Japan's march to war He follows this history up through recent apologies by several Zen sects for their support of the war and the way support for militarism was transformed into corporate Zen in postwar Japan The second edition includes a substantive new chapter on the roots of Zen militarism and an epilogue that explores the potentially volatile mix of religion and war With the increasing interest in Buddhism in the West this book is as timely as it is certain to be controversial

Philosophy and the Martial Arts Graham Priest, Damon Young, 2014-09-19

This is the first substantial academic book to lay out the philosophical terrain within the study of the martial arts and to explore the significance of this fascinating subject for contemporary philosophy. The book is divided into three sections. The first section concerns what philosophical reflection can teach us about the martial arts and especially the nature and value of its practice. The second section deals with the other direction of the dialectical interplay between philosophy and the martial arts: how the martial arts can inform philosophical issues important in their own right. Finally, because many of the notable martial arts are of Asian origin, there are particularly close links between the arts and Asian philosophies and Buddhism in particular, and therefore the last section is devoted to this topic. The essays in this collection deal with a wide range of philosophical issues: normative ethics, meta-ethics, aesthetics, phenomenology, the philosophy of mind, Ancient Greek and Buddhist thought. By demonstrating the very real nature of the engagement between the martial arts and philosophy, this book is essential reading for any serious student or scholar with an interest in the martial arts, Eastern philosophy, the philosophy of sport, or the study of physical culture.

Essential Buddhism Jack Maguire, 2001-06. It identifies how the principal concepts and practices originated and evolved through diverse cultural adaptations into three formats: Theravada, Mahayana, and Vajrayana.

Dōgen's texts Ralf Müller, George Wrisley, 2023-12-07. This book addresses the question of how to properly handle Dōgen's texts, a core issue that became critical during the Meiji period in which the philosophical appropriation of Dōgen became apparent inside and outside of the monastery. In present-day Dōgen studies, most scholarship is informed by a number of factions representing Dōgen. The chapters herein address the Zenist's emphasis on practice, the Genzōnians' emphasis on shifting the attention to the close reading of Dōgen's texts, the laity movement opening up both the texts and the practice to people in modern society, and the Genzō researchers' search for the authenticity and truth of Dōgen's writings. The book aims to clarify the rightful place of Dōgen in the monastery, in denominational studies, or in modern academic philosophy. It brings forth various viewpoints on Dōgen and analyzes the relations of these viewpoints from the premodern to modern times. The collected volume appeals to students and researchers in the field while establishing hermeneutic standards of reading and proposing new original and critical interpretations of Dōgen's texts.
