A New Science of the Paranormal Lawrence LeShan, 2013-08-15 Mainline science rejects the paranormal because it cannot be proven by the classical methods of controlled experiments But sciences such as geology astronomy and anthropology also don't rely on laboratory testing for repeatable results Moreover psi concerns consciousness which is by definition nonquantitative Psi researchers must stop acting like science's poor relations says author Lawrence LaShan limiting themselves to controlled experiments such as analyzing statistics of people guessing cards being flipped in the next room This provocative book outlines the principles of making a real study of the large exciting events clairvoyance and precognition mediumship and spirit controls psychic healing that would bring mainline science into and revitalize the whole field And the issue is not just academic says LeShan The old materialistic worldview has not worked Psychic research he argues can transform our sense of reality itself to offer a new and more hopeful picture of ourselves and of the world

Patriotism for Grownups Eda J. LeShan, Lawrence L. LeShan, 2005 Patriotism is loyalty to a group We regard the person without it as paltry at best Historically the size of the group to which most of us have been loyal has increased from the family to the tribe to the city to the state or province and now to the nation Today our children use the Internet as if there were no such things as national borders We all know the radioactive clouds viruses the clean air from healthy oceans and rainforests and the polluted air from uncaring human acts do not notice the fences and custom offices that mark off spaces as separate countries on our only beautiful planet We have for the first time in history an opportunity and necessity to continue the great slow movement of patriotism toward inclusion of all human beings This book is a handbook on how to do this not to make our loyalty to our native country less but to make our loyalty to the entire human race more The great Utopian goals have all failed and we have little interest in them today The way to go forward is in small steps and actions that can be done without major changes in our everyday life Eleanor Roosevelt wrote It is better to light one candle than to curse the darkness If enough of us light one candle each we will have a blazing light to guide us to a brighter future **Dictionary Of Modern American Philosophers** John R. Shook, 2005-05-15 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from

philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought

Existential-Phenomenological Perspectives in Psychology Ronald S. Valle, Steen Halling, 2013-03-08 When I began to study psychology a half century ago it was defined as the study of behavior and experience By the time I completed my doctorate shortly after the end of World War II the last two words were fading rapidly In one of my first graduate classes a course in statistics the professor announced on the first day Whatever exists exists in some number We dutifully wrote that into our notes and did not pause to recognize that thereby all that makes life meaningful was being consigned to oblivion This bland restructuring perhaps more accurately destruction of the world was typical of its time 1940 The influence of a narrow scientific attitude was already spreading throughout the learned disciplines In the next two decades it would invade and tyrannize the social sciences education and even philosophy To be sure quantification is a powerful tool selectively employed but too often it has been made into an executioner's axe to deny actuality to all that does not yield to its procrustean demands

Restorative Justice Gerry Johnstone, 2013-03 The second edition of this renowned text explores the implications of developments in the restorative justice campaign to provide a feasible and desirable alternative to mainstream thinking on matters of crime and justice It includes a new chapter identifying and analyzing fundamental shifts and developments in restorative justice thinking over the last decade
