intervención educativa con los escolares por parte de los docentes en Educación Física. El docente cuenta con una posición privilegiada para observar de forma directa y continua la actitud postural tanto en situaciones de reposo como de actividad física a lo largo de la escolarización del alumno y con ello realizar la labor de prevención y derivación médica en los casos que considere. La intervención que realiza el docente es invasiva ya que con ella facilita la organización del esquema corporal y el desarrollo de los sistemas y capacidades físicas del alumno. Los estudios científicos previos ponen de manifiesto que el principal factor de riesgo de las desviaciones posturales en el niño y en el adolescente están relacionados con el crecimiento y sus hábitos cotidianos. La incidencia de las alteraciones posturales en la población infantil es cada vez mayor debido a factores ambientales hereditarios y culturales. Estos hechos implican complicaciones a nivel muscular, esquelético y articular que llevan al niño a mecanizar actitudes de tipo compensatorio con relación a posiciones estáticas y dinámicas. Estas ocasionan limitaciones en su motricidad y desequilibrios que se incrementan día a día y que con la edad adulta se pueden llegar a convertir en una molestia que repercute en la salud física y psicológica. Para desarrollar esta labor de prevención es necesario que se instruya de forma específica al profesorado de Educación Física en la prevención de las alteraciones posturales ya que con una buena intervención educativa muchas de ellas pueden corregirse o reeducarse. Esta formación específica debe estar basada en el desarrollo de las capacidades motrices especialmente el equilibrio, las compensaciones musculares, la ergonomía y los tests posturales. Por lo tanto para una buena postura es importante el mantenimiento de una buena organización y alineación ya que si existiera una desorganización en un segmento del cuerpo implicaría una nueva organización del resto de segmentos asumiendo posiciones compensatorias la cual también influye en las funciones motoras dependientes. La etapa de la niñez resulta idónea para hacer detección y prevención. Esta labor puede realizarse mediante la educación en los hábitos posturales saludables. De esta manera se podrá garantizar una mejor calidad de vida en los años posteriores dada la facilidad y plasticidad de aprendizaje a estas edades. La investigación que se presenta evalúa la postura corporal del alumnado y realiza una intervención de 3 meses de duración en la que desarrolla 2 veces a la semana un conjunto de ejercicios con la intención de mejorar la postura corporal.

Los estiramientos son herramientas al alcance de todos que contribuyen de una manera fácil, cómoda y agradable al rejuvenecimiento del cuerpo y a la mejora del estado de ánimo. Los estiramientos descritos y explicados con detalle en este libro son excelentes para la tercera edad y también para todas aquellas personas que desean realizar un ejercicio suave y eficaz. Esta obra ofrece un programa esmerado y minucioso de ejercicios que ayudan a estirar y desbloquear las diferentes partes del cuerpo, teniendo en cuenta la importancia de la respiración. Las numerosas y amplias fotografías facilitan la comprensión de las explicaciones y las ilustraciones muestran precisas descripciones anatómicas de los músculos trabajados. Cómo vivir sin dolor si eres músico Ana Velázquez, 2021-02-02. Los músicos están expuestos más que la mayoría de las profesiones a lesiones musculares y articulares debido a la repetición de sus movimientos. La mejor manera de prevenirlas es enseñando desde los comienzos la más óptima colocación del instrumento y evitar las alteraciones en el sistema postural. Este libro ofrece los recursos necesarios en cada tipo de instrumento para mejorar la postura interpretativa y evitar lesiones que mermen el trabajo de un músico. Cuando me fracturó el dedo me quedé no me podía imaginar que iba a mejorar el potencial físico y técnico de mis manos hasta el punto que me ha guiado Ana Velázquez. Con ella he descubierto nuevas formas de desarrollar fuerza en mis dedos y a tocar el piano en una posición más correcta, su guía ha sido fundamental para mi recuperación. Chano Domínguez. El cuerpo es el instrumento con el que se canta. A lo largo de mi vida profesional he ido constatando que cuanto más conoce un intérprete las posibilidades de su cuerpo, mejor lo gestiona, mejor canta, mejor vive. Entre las técnicas que he incorporado a mi actividad docente, la fisioterapia de Ana Velázquez siempre me ha dado resultados satisfactorios. Carmen Bustamante.
