Green Business – the Billion Dollar Deal: The Dot-coms Make an Exit – Showtime for the Dot-greens Dietrich Walther, 2012-05-01 The investment strategies and entrepreneurial heart of the dot com bubble should be used as a rough guideline for the development of a sustainable dot green boom This book outlines the methods necessary for that development and hints at needed institutional and educational changes to reach that goal

Vegetation of the Earth and Ecological Systems of the Geo-biosphere Heinrich Walter, 2012-12-06 We shall limit our observations to the conditions in natural ecosystems since it would be beyond the scope of this book to embark upon a consideration of secondary man made ecosystems

2 Classification of the Geo biosphere into Zonobiomes The biosphere is the thin layer of the earth's surface to which the phenomena connected with living matter are confined On land this comprises the lowest layer of the atmosphere permanently inhabited by living organisms and into which plants extend as well as the root containing portion of the lithosphere which we term the soil Living organisms are also found in all bodies of water to the very depths of the oceans In a watery medium however cycling of material is achieved by means other than those on land and the organisms plankton are so different that aquatic ecosystems have to be dealt with separately The biosphere is therefore subdivided into a the geo biosphere comprising terrestrial ecosystems and b the hydro biosphere comprising aquatic ecosystems which is the field of hydrobiologists oceanographers and limnologists Our studies are confined to the geo biosphere Walter 1976 which constitutes the habitat of man and is therefore of special interest The prevailing climate being the primary independent factor in the environment can be used as a basis for further subdivision of the geo biosphere since the formation of soil and type of vegetation are dependent upon it see p 3 and it has not yet been substantially influenced by man

Post-Ecologist Politics Ingolfur Blühdorn, 2012-10-12 Since the late 1980s ecological thought and the European eco movement have gone through a phase of fundamental transformation which has been widely acknowledged but not yet theorised in any satisfactory way This important text questions why radical ecological criticism has had so little impact on contemporary society despite the urgency of the issues it highlights The book offers a challenging theoretical critique of ecological thought itself

Philosophy after Marx Christoph Henning, 2014-04-17 Christoph Henning writes a concise history of misreadings of Marx in the 20th century Focussing on German philosophy from Heidegger to Habermas he also addresses the influence of Rawls and Neopragmatism subsequently scrutinizing a previous history of Marx interpretations that had served as the premises upon which these later works were based Henning sketches a historical trajectory in which a theory of socialist politics enters the fields of economics sociology critical theory and theology before finally overloaded with intellectually dead freight entering into philosophy In so doing he takes a hermeneutic approach to how misreadings in a specific field proliferate into further misreadings across a variety of fields leading to an accumulation of questionable preconceptions With the recent resurgence of interest in Marx Henning's historical recursions make evident where and how academic Anti Marxism had previously got it wrong English translation of *Philosophie nach Marx 100 Jahre Marxrezeption und die normative Sozialphilosophie der Gegenwart in der Kritik* Transcript Verlag Bielefeld 2005

Dissident Marxism and Utopian Eco-Socialism in the German Democratic Republic Alexander Amberger, 2024-02-06 Rudolf Bahro Wolfgang Harich and Robert Havemann were probably the best known critics of the DDR's ruling Socialist Unity Party Yet they saw themselves as Marxists and their demands extended far beyond a democratisation of real socialism When environmental issues became more important in the West in the 1970s the Party treated it as an ideological manoeuvre of the class enemy The three dissidents saw things differently they combined socialism and ecology adopting a utopian perspective frowned upon by the state In doing so they created political concepts that were unique for the Eastern Bloc Alexander Amberger introduces them relates them to each other and poses the question of their relevance then and now

The Rush to Policy Peter William House, Roger Roger Don Shull, *Rush to Policy* explores the appropriate role of technical analysis in policy formulation The authors ask when and how the use of sophisticated analytic techniques in decision making benefits the nation They argue that these techniques are too often used in situations where they may not be needed or understood by the decision maker where they may not be to answer the questions raised but are nonetheless required by law House and Shull provide an excellent empirical base for describing the impact of politics on policies policy analysis and policy analysts They examine cost benefit analysis risk analysis and decision analysis and assess their ability to substitute for the current decision making process in the public sector They examine the political basis of public sector decision making how individuals and organizations make decisions and the ways decisions are made in the federal sector Also they discuss the mandate to use these methods in the policy formulation process The book is written by two practicing federal policy analysts who in a decade of service as policy researchers developed sophisticated quantitative analytic and decision making techniques They then spent several years trying to use them in the real world Success and failures are described in illuminating detail providing insight not commonly found in such critiques The authors delineate the interaction of politics and technical issues Their book describes policy analysis as it is not how it ought to be Peter W House is the director of policy research and analysis at the National Science Foundation He is the author of ten books on multidisciplinary science and technology policy research and analyses in government private and university sectors including *The Art of Public Policy Analysis* and with Roger D Shull *Regulatory Reform Politics and the Environment and Regulations and Science Management of Research on Demand* Roger D Shull is a senior analyst at the Division of Policy Research and Analysis National Science Foundation

Konfuzianisches Ethos und westliche Wissenschaft Hu Qihua, 2016-05-20 This study in German offers profound insights into the life and thoughts of Wang Guowei 1877-1927 Like many intellectuals who strongly perceived the necessity of reforms in the waning years of the Late Qing dynasty i.e. after the Opium wars Wang sought to strengthen China's position against foreign in particular Western powers Contrary to earlier approaches which either advocated a close adherence to Confucian traditions or tried to adapt only elements of Western material culture mainly

industrial and military technology Wang Guowei aimed at reviving traditional Chinese culture by analysing its source texts using a modern scientific approach and thereby started the discipline of guoxue national studies and simultaneously adapting compatible elements of Western immaterial culture Thus Wang became known as an authority on Chinese paleography as well as on German philosophy especially Kantian epistemology *From Kamrabad to Cologne. Wanderer Between Two Worlds* Saral Sarkar,2025-01-13 In his autobiography Saral Sarkar takes us along on a journey through his interesting and eventful life He is one of the few persons who experienced the first full half of his life in a poor third world country India and the other half in a very developed European country Germany And he experienced these two countries intensively Unlike so many other immigrants he did not come to Germany for economic reasons but initially in the 1960s because of his love for the German language being trained there as teacher for German and then later in the 1980s he stayed there because of his love for his wife Maria Mies a famous German feminist and sociologist From an early age he was very interested in political issues and movements initially mainly from the left spectrum but later from the early 1970s on his concern for ecological issues came to the foreground The famous book *The Limits to Growth* from 1972 which influenced an entire generation and served as an important impetus for the ecology movement was also a turning point in his personal thinking He experienced the rise of the green movement and the Green Party in Germany at first hand but also left the Greens in disappointment in the second half of the 1980s But it was not only political activism that shaped his life From the 1980s onwards he became an increasingly prominent author on environmental and political issues with his two major works *Eco Socialism or Eco Capitalism A Critical Analysis of Humanity's Fundamental Choices* and *The Crises of Capitalism A Different Study of Political Economy* It is no exaggeration to say that he is one of the most important contemporary thinkers on eco political issues one who coined the term eco socialism in a consequent and clear way *Analytical Philosophy of Technology* F. Rapp,2012-12-06 Friedrich Rapp in this magisterial and critical essay on technology the complex human phenomenon that demands philosophy of science philosophy of culture moral insight and historical sensitivity for its understanding writes modestly of the grave and tentative situation in the philosophy of technology Despite the profound thinkers who have devoted time and imagination and rational penetration despite the massive literature now available the varied and comparative viewpoints of political analytic despite metaphysical cultural even esthetic commitments indeed despite the honest joining of historical and systematic methods of investigation we are far from a satisfactory understanding of the joys and sorrows the achievements and disappointments of the technological saga of human societies Professor Rapp has prepared this report on the philosophical understanding of technology for a troubled world if ever philosophy were needed it is in the practical attempt to find alternatives among technologies to foresee dangers and opportunities to choose with a sense of the possibility of fulfilling humane values Emerson spoke of the scholar not as a specialist apart but as Man thinking and Rapp's essay so speaks to all of us industrial world or third world engineers or humanists tired or energetic fearful or

Eibl-Eibesfeldt, 2017-07-28 With the discovery of conditioned reflexes by I P Pavlov the possibilities for experimenting following the example set by the classical exact sciences were made available to the behavioral sciences Many psychologists hoped that the component parts of behavior had also been found from which the entire multifaceted cosmos of behavior could then be constructed An experimentally oriented psychology subsequently developed including the influential school of behaviorism This first text on human ethology presents itself as a unified work even though not every area could be treated with equal depth For example a branch of ethology has developed in the past decade which places particular emphasis on ecology and population genetics This field known as sociobiology has enriched discussion beyond the boundaries of behavioral biology through its stimulating and often provocative theses After vigorous debates between behaviorists anthropologists and sociologists we have entered a period of exchange of thoughts and a mutual approach which in many instances has led to cooperative projects of researchers from different disciplines This work offers a biological point of view for discussion and includes data from the author's cross cultural work and research from the staff of his institute It confirms above all else the astonishing unity of mankind and paints a basically positive picture of how we are moved by the same passions jealousies friendliness and active curiosity The need to understand ourselves has never been as great as it is today An ideologically torn humanity struggles for its survival Our species does not know how it should compensate its workers and it experiments with various economic systems constitutions and forms of government It struggles for freedom and stumbles into newer conflicts Population growth is apparently completely out of hand and at the same time many resources are being depleted We must consider our existence ratio **Vegetationszonen und Klima Engl** Heinrich Walter, Siegmund-Walter
