Contemporary Natural Philosophy and Philosophies - Part 1 Gordana Dodig-Crnkovic, Marcin J. Schroeder, 2019-06-11 Modern information communication technology eradicates barriers of geographic distances making the world globally interdependent but this spatial globalization has not eliminated cultural fragmentation The Two Cultures of C P Snow that of science technology and that of humanities are drifting apart even faster than before and they themselves crumble into increasingly specialized domains Disintegrated knowledge has become subservient to the competition in technological and economic race leading in the direction chosen not by the reason intellect and shared value based judgement but rather by the whims of autocratic leaders or fashion controlled by marketers for the purposes of political or economic dominance If we want to restore the authority of our best available knowledge and democratic values in guiding humanity first we have to reintegrate scattered domains of human knowledge and values and offer an evolving and diverse vision of common reality unified by sound methodology This collection of articles responds to the call from the journal *Philosophies* to build a new networked world of knowledge with domain specialists from different disciplines interacting and connecting with other knowledge and values producing and knowledge and values consuming communities in an inclusive extended contemporary natural philosophic manner In this process of synthesis scientific and philosophical investigations enrich each other with sciences informing philosophies about

Textual Wanderings Rhian Atkin,2017-12-02 Digression is a crucial motif in literary narratives It features as a key characteristic of fictional works from Cervantes and Sterne to Proust Joyce and Calvino Moving away from a linear narrative and following a path of associations reflects how we think and speak Yet an author's inability to stick to the point has often been seen to detract from a work of literature somehow weakening it This wide ranging and timely volume seeks to celebrate narrative digressions and move towards a theoretical framework for studying the meanderings of literary texts as a useful and valuable aspect of literature Essays discussing some of the possibilities for approaching narrative digression from a theoretical perspective are complemented with focused studies of European and American authors As a whole the book offers a broad and varied view of textual wanderings *Selected Writings: 1927-1934* Walter Benjamin,Howard Eiland,Gary Smith,1996 Comprising more than 65 pieces journal articles reviews extended essays sketches aphorisms and fragments this volume shows the range of Walter Benjamin's writing His topics here include poetry fiction drama history religion love violence morality and mythology **Romanticism and the Sciences** Dr. Andrew Cunningham,Nicholas Jardine,1990-06-28 This book presents a series of essays which focus on the role of Romantic philosophy and ideology in the sciences
