Gothic Architecture And Scholasticism:

Gothic Architecture and Scholasticism Erwin Panofsky, 1957 Erwin Panofsky was one of the great scholars of the twentieth century Panofsky modestly described his second annual Wimmer Lecture at Saint Vincent College as another diffident attempt at correlating Gothic architecture and scholasticism but it has remained in print in numerous languages for more than half a century His lecture stands as a brilliant man's tribute to the legacy of Christian humanism

Gothic Architecture and Scholasticism Erwin Panofsky, 2003-01-01 [Gothic architecture and scholasticism : Wimmer lecture, 1948](#) Erwin Panofsky, 1951 *Scholasticism* Jose Ignacio Cabezon, José Ignacio Cabezón, 1998-05-28 Leading scholars in the field of religious studies show that scholasticism as a comparative category is useful in the analysis of a variety of religious and philosophical traditions and even in the task of cultural criticism

Invisible Cathedrals Neil H. Donahue, 1995 *Invisible Cathedrals* places Wilhelm Worringer in the foreground of discussions of Expressionism and German Modernism for the first time These essays not only reveal the complexities of his individual works such as *Abstraction and Empathy* 1908 and *Form Problems of the Gothic* 1911 they also examine his lesser known books and essays of the post World War I years the 1920s and beyond *Invisible Cathedrals* offers both a basic introduction to Worringer's writings and their broad influence and a profound and detailed revisionist analysis of his significance in German and European Modernism It also provides the most comprehensive bibliography to date of his own work and of the scattered criticism devoted to Worringer in different disciplines Worringer's works were provocative widely read and often reprinted and were highly influential among artists and writers in Germany As a result they both raised suspicion in his own academic discipline of art history and excited discussion in other diverse fields such as literary and social theory psychology and film theory Worringer emerges here not solely as a scholarly commentator on the history of art but also as an activist scholar who engaged his historical criticism of other periods directly in the production of culture in his own time Contributors are Magdalena Bushart Neil H Donahue Charles W Haxthausen Michael W Jennings Joseph Masheck Geoffrey Waite and Joanna E Ziegler

[The Premodern Condition](#) Bruce Holsinger, 2005-12 Bruce Holsinger identifies and explains an affinity for medievalism and medieval studies among the leading figures of critical theory His book contains original essays by Bataille and Bourdieu translated into English that testify to the strange persistence of medievalisms in French postwar writings

The Spatial Logic of Social Struggle Nikolaus Fogle, 2011-04-07 Pierre Bourdieu's theory of practice is widely regarded as among the most innovative and illuminating fruits of recent social thought As evidence mounts that the spatial turn in the social sciences and humanities is no mere theoretical fad but rather an enduring paradigm of social and cultural research Bourdieu's status as a profoundly spatial thinker takes on a renewed importance *The Spatial Logic of Social Struggle* A Bourdieuan Topology focuses on Bourdieu's philosophy of space arguing that space is at once a condition for social knowledge a methodological instrument and a physical context for practice By considering Bourdieu's theory of social space and fields alongside his several accounts

of socially potent physical spaces Nikolaus Fogle develops an understanding of the systematic co determinations between social and physical space He traces Bourdieu s ideas about the spatiality of social life through his investigations of Algerian peasant villages and Gothic cathedrals as well as spaces of class lifestyle and cultural creation revealing that social and environmental struggles are only logical insofar as they are topological He also demonstrates how a Bourdieuan dialectical understanding of social and physical space can be brought to bear on contemporary issues in architecture and urban development This book will be useful and accessible not only to philosophers but also to architects geographers sociologists and other scholars in the social sciences and humanities who take an interest in the social theory of space American Theological Inquiry, Volume Eight, Issue One Gannon Murphy, 2015-09-08 American Theological Inquiry ATI reaches thousands of Christian scholars clergy and other interested parties primarily in the U S and U K The journal was formed in 2007 by Gannon Murphy PhD Theology Univ Wales Lampeter Presbyterian Reformed and Stephen Patrick PhD Philosophy Univ Illinois Eastern Orthodox to open up space for Christian scholars who affirm the Ecumenical Creeds to contribute research throughout the broader Christian scholarly community in America and the West The purpose of ATI is to provide an inter tradition forum for scholars who affirm the historic Ecumenical Creeds of Christendom to constructively communicate contemporary theologies developments ideas commentaries and insights pertaining to theology culture and history toward reforming and elevating Western Christianity ATI seeks a critical function as much or more so as a quasi ecumenical one The purpose is not to erase or weaken the distinctives of the various ecclesial traditions but to widen the dialogue and increase inter tradition understanding while mutually affirming Christ s power to transform culture and the importance of strengthening Western Christianity with special reference to Her historic creedal roots Theologians would be theologians and the theologically attentive will want to check out American Theological Inquiry Richard John Neuhaus 1936 2009 First Things

The Architecture of Art History Mark Crinson, Richard J. Williams, 2018-12-13 What is the place of architecture in the history of art Why has it been at times central to the discipline and at other times seemingly so marginal What is its place now Many disciplines have a stake in the history of architecture sociology anthropology human geography to name a few This book deals with perhaps the most influential tradition of all art history examining how the relation between the disciplines of art history and architectural history has waxed and waned over the last one hundred and fifty years In this highly original study Mark Crinson and Richard J Williams point to a decline in the importance attributed to the role of architecture in art history over the last century which has happened without crisis or self reflection The book explores the problem in relation to key art historical approaches from formalism to feminism to the social history of art and in key institutions from the Museum of Modern Art to the journal October Among the key thinkers explored are Banham Baxandall Giedion Panofsky Pevsner Pollock Riegl Rowe Steinberg Wittkower and W lfflin The book will provoke debate on the historiography and present state of the discipline of art history and it makes a powerful case for the reconsideration of architecture *The Haskins Society*

Occupation in the Australian Short Story Patrick West, 2024-05-28 Patrick West's Architectures of Occupation in the Australian Short Story cultivates the potential for literary representations of architectural space to contribute to the development of a contemporary politics of Australian post colonialism West argues that the predominance of tropes of place within cultural and critical expressions of Australian post colonialism should be re balanced through attention to spatial strategies of anti colonial power To elaborate the raw material of such strategies West develops interdisciplinary close readings of keynote stories within three female authored pan twentieth century Australian short story collections Bush Studies by Barbara Baynton 1902 Kiss on the Lips and Other Stories by Katharine Susannah Prichard 1932 and White Turtle A Collection of Short Stories by Merlinda Bobis 1999 The capacity of the short story form to prompt creative and politically germinal engagements with species of space associated with architecture and buildings is underscored Relatedly West argues that the recent resurgence of binary thought on local national and international scales occasions an approach to the short story collections shaped by binary relationships like a dichotomy of inside and outside Concluding his argument West connects the literary and architectural critiques of the story collections to the wicked problem linked to ongoing colonial violences of improving Australian Indigenous housing outcomes Innovative and interdisciplinary this book will be of interest to scholars and students of Literary Architectural and Postcolonial Studies **Alphanumeric Cosmology From Greek into Arabic** Juan Acevedo, 2020-07-07 Juan Acevedo embarks on a semantic journey to track the origin and adventures of the Greek term stoicheion which for at least eighteen centuries from Pythagoras to Fibonacci simultaneously meant element

letter and numeral Focusing on this triple meaning and on how it was translated and interpreted in Latin Hebrew and Arabic especially in key texts of the Abrahamic faiths a metaphysical study takes shape With touches of alchemy and theology it reveals how a shared fundamental alphanumeric cosmology underlay many basic paradigms of science and faith around the Mediterranean until the advent of the Indo Arabic numerals broke the marriage of letter and numeral Careful readings of Plato Philolaos Nicomachus and Philo of Genesis and the Sefer Yetsira of the Qur'an the Ikhwan al Safa and Ibn Arabi are all woven together into a synthesis full of implications for many disciplines

Theology in Built Environments Sigurd Bergmann, 2017-07-12 Built space is both a physical entity as well as a socially and historically constructed place It constantly interacts with human beings affecting their behavior thinking and feeling Doing religious work in a particular environment implies acknowledging the surroundings to be integral to theology itself The contributors to this volume view buildings scriptures conversations prayers preaching artifacts music and drama and built and natural surroundings as contributors to a contextual theology The view of the environment in which religion is practiced as integrated with theology represents not just a new theme but also a necessity if one is to understand religion's own depth Reflections about space and place and how they reflect and affect religious experience provide a challenge and an urgent necessity for theology This is particularly important if religious practitioners are to become aware of how theology is given expression in the existential spatiality of life Can space set theology free This is a challenging question one that the editor hopes can be answered at least in part in this volume The diversity of theoretical concepts in aesthetics cultural theory and architecture are not regarded as a problem to be solved by constructing one overarching dominant theory Instead this diversity is viewed in terms of its positive potential to inspire discourse about theology and aesthetics In this discourse theology does not need to become fully dependent on one or another theory but should always clearly present its criteria for choosing this or that theoretical framework This volume shows clearly how different modes of design in sacred spaces capture a sense of the religious

Cultural Renewal Arthur Pontynen, 2018-02-06 The decline of interest in the liberal and fine arts is widely lamented At issue is why this decline happened and how we might restore qualitative standards by which to live Arthur Pontynen argues that cultural decline is the consequence of a tragically anti intellectual academic tradition and its alternative is the cosmopolitan pursuit of wisdom and beauty Pontynen writes that the liberal and fine arts are justified by their attempt to understand the material realization of wisdom of that which is true and good in reality and life The current decline marks a denial that such qualitative aspirations are realistic Instead of understanding art as the intellectual pursuit of ontological perfection perfection is subjectified as willful preference or experience Consequently the liberal and fine arts have been displaced by a naturalistic social science and a relational existentialism This reduction denies qualitative thoughts words and deeds Pontynen establishes that the arts are not obsolete merely subjectivist or limited to a brutal de constructivism He argues for a renewed idealism that is neither reductionist trivializing or brutalized Pontynen offers an alternative global

narrative that is both realistic and idealistic one that permits us to distinguish between the trivial the brutal and the profound
