These alternate teaching learning strategies appeal to students who want to engage in the learning process rather than listen to lectures. These strategies incorporate the sciences, arts, and humanities to provide a more holistic approach to learning and to facilitate the student's understanding of the broad scope of nursing. They are applicable for the beginning nursing student and the student nearing graduation and licensure. Integrating these strategies into the curricula not only enhances student learning and improves programmatic outcomes but can also improve student satisfaction with courses and instructors.
