Learning Together Online Starr Roxanne Hiltz,Ricki Goldman,2004-09-22 This book addresses the past and future of research on the effectiveness of asynchronous learning networks courses in which students and teachers learn together online via the Internet An integrated theoretical framework called Online Interaction Lea Virtual Society? Steve Woolgar,2002-09-26 Almost all aspects of social cultural economic and political life stand to be affected by the new electronic technologies Virtual Society is one vision of the consequential impact of these technologies But to what extent and in what ways are the Internet and other electronic technologies really changing our lives To what extent are we moving to a virtual society This collection provides a comprehensive set of detailed empirical studies of the genesis and use of these new technologies ranging widely across application areas from cyber caf s to new media email and organizational memory to surveillance capable technologies in the workplace virtual reality to CCTV in high rise housing stock exchange addicts to student study networks It offers a unique perspective analytic scepticism for making sense of some surprisingly counterintuitive results and for developing a refreshingly critical view of many taken for granted assumptions about the impact of the Internet on social relations and institutions Each chapter presents a high quality exemplar of its own disciplinary perspective addressed to a general social science audience The diversity of disciplinary perspectives is brought to bear in a central message laid out in the opening discussion of the Five Rules of Virtuality that with due reflexive caution and ironic sensitivity general messages can be drawn from the observations of particular substantive contexts In particular claims that we are moving to a virtual society need to be tempered by a reassessment of connections between what counts as real and virtual This book will appeal to students and researchers in a very wide range of disciplines both within and beyond the social sciences and management and to all practitioners struggling with the realities of the new virtual technologies

Assessing for Learning Peggy L. Maki,2023-07-03 While there is consensus that institutions need to represent their educational effectiveness through documentation of student learning the higher education community is divided between those who support national standardized tests to compare institutions educational effectiveness and those who believe that valid assessment of student achievement is based on assessing the work that students produce along and at the end of their

educational journeys This book espouses the latter philosophy what Peggy Maki sees as an integrated and authentic approach to providing evidence of student learning based on the work that students produce along the chronology of their learning She believes that assessment needs to be humanized as opposed to standardized to take into account the demographics of institutions as students do not all start at the same place in their learning Students also need the tools to assess their own progress In addition to updating and expanding the contents of her first edition to reflect changes in assessment practices and developments over the last seven years such as the development of technology enabled assessment methods and the national need for institutions to demonstrate that they are using results to improve student learning Maki focuses on ways to deepen program and institution level assessment within the context of collective inquiry about student learning Recognizing that assessment is not initially a linear start up process or even necessarily sequential and recognizing that institutions develop processes appropriate for their mission and culture this book does not take a prescriptive or formulaic approach to building this commitment What it does present is a framework with examples of processes and strategies to assist faculty staff administrators and campus leaders to develop a sustainable and shared core institutional process that deepens inquiry into what and how students learn to identify and improve patterns of weakness that inhibit learning This book is designed to assist colleges and universities build a sustainable commitment to assessing student learning at both the institution and program levels It provides the tools for collective inquiry among faculty staff administrators and students to develop evidence of students abilities to integrate apply and transfer learning as well as to construct their own meaning Each chapter also concludes with 1 an Additional Resources section that includes references to meta sites with further resources so users can pursue particular issues in greater depth and detail and 2 worksheets guides and exercises designed to build collaborative ownership of assessment The second edition now covers Strategies to connect students to an institution s or a program s assessment commitment Description of the components of a comprehensive institutional commitment that engages the institution educators and students all as learners Expanded coverage of direct and indirect assessment methods including technology enabled methods that engage students in the process New case studies and campus examples covering undergraduate graduate education and the co curriculum New chapter with case studies that presents a framework for a backward designed problem based assessment process anchored in answering open ended research or study questions that lead to improving pedagogy and educational practices Integration of developments across professional scholarly and accrediting bodies and disciplinary organizations Descriptions and illustrations of assessment management systems Additional examples exercises guides and worksheets that align with new content **Library Furnishings** Tish Murphy,2015-02-18 The life expectancy of a typical library is 20 or so years This useful life can be greatly extended however with extensive planning and an informed choice of versatile adaptable furnishings Everything you need to know to accomplish this feat can be found within the pages of this volume Professional experienced advice and suggestions

take the library designer through the entire design process This book provides a plethora of information from the planning stages through the finished media center to allow any librarian or architect to make informed cost effective decisions The work begins with the creation of the development team explains terminology employed by furniture manufacturers and the conventions used for furnishing measurements Topics covered include the installation of adequate and stable shelving user friendly seating arrangements and plans for satisfying ever increasing technological requirements Appendices contain a number of checklists covering such areas as the tasks and responsibilities of the development team evaluations of various work stations and seating options ADA surveys and electronic planning Detailed diagrams and photographs from completed designs are also included From colors to work spaces and furniture composition Tish Murphy s twenty years of experience in the field provides the reader with firsthand knowledge regarding what works and what doesn t in the world of library furnishings **Fear of a Hip-Hop Planet** D. Marvin Jones,2013-04-01 Is Gangsta Rap just black noise Or does it play the same role for urban youth that CNN plays in mainstream America This provocative set of essays tells us how Gangsta Rap is a creative report about an urban crisis our new American dilemma and why we need to listen Increasingly police politicians and late night talk show hosts portray today s inner cities as violent crime ridden war zones The same moral panic that once focused on blacks in general has now been refocused on urban spaces and the black men who live there especially those wearing saggy pants and hoodies The media always spotlights the crime and violence but rarely gives airtime to the conditions that produced these problems The dominant narrative holds that the cause of the violence is the pathology of ghetto culture Hip hop music is at the center of this conversation When 16 year old Chicago youth Derrion Albert was brutally killed by gang members many blamed rap music Thus hip hop music has been demonized not merely as black noise but as a root cause of crime and violence Fear of a Hip Hop Planet America s New Dilemma explores and demystifies the politics in which the gulf between the inner city and suburbia have come to signify not only a socio economic dividing line but a new socio cultural divide as well *Fix Schools First* Jack E. Bowsher,2001 An educator working with big corporations Bowsher argues that schools damage children that poverty minorities and low parental involvement are the result rather than the cause of poor student learning that appropriate responsibilities need to be established for teachers and administrators and Academic Libraries as High-tech Gateways Richard J. Bazillion,Connie Braun,2001 Fast changing technology has turned academic libraries into gateways to electronic resources both within and beyond library walls This updated new edition is packed with photographs and practical hands on tools that will guide you through the process of planning and building an academic library space for the future Learn how to create a space that incorporates the latest innovations in academic library facility design is flexible for changing information technology needs and balances design comfort and physical space demands The authors have not only gone through the process but have also studied libraries around the country in order to determine the best ways to streamline access to information Make your library a high tech
