McNeil, 2017-05-03 You're about to become a library supervisor. In addition to excitement, you may also feel some uncertainty. Mentor, creator, monitor, and negotiator are some of the roles a supervisor must play, and wearing that many hats is a challenge that requires discipline and organization and a healthy sense of humor. This newly updated and revised edition of a classic text will give you the grounding to supervise, manage, and lead with confidence. A perfect handbook for those just moving into a supervisory position and a welcome refresher for current managers, this resource focuses on daily real-world issues, offering discussion of how to foster a positive work environment by determining the character of your organization, dozens of sample interview questions suitable for different contexts, and other pointers on the hiring process, advice on supervising all different kinds of employees from those with structural personalities to creative types, tactics for leading productive and focused staff meetings, guidance on how to develop shared accountability, overcoming the decision dilemma so common in group settings, and other strategies for building successful teams. Easy-to-follow tips for making email a genuine productivity tool, methods for meeting deadlines through backward planning, 11 steps for developing a clear and balanced performance appraisal, techniques for actively addressing complaints, and examples of non-monetary staff rewards such as flexible scheduling, job enrichment, and celebrations. Planning and Assessment for Libraries Rachel A. Fleming-May, Regina Mays, 2021-07-23 The concepts of planning and assessment are intrinsically linked, and understanding them is essential for raising the library's profile and strengthening its position among stakeholders and the community. Even if you're an LIS student or are new to the profession or if planning or assessment are not your primary areas of responsibility, you still have a role to play in the success of organizational efforts. Fleming-May has more than a decade of experience in planning and assessment initiatives and instruction, and Mays was her institution's first assessment librarian. Their primer draws from theory, research, and their first-hand observations to illuminate such topics as characteristics of bad planning strategy that can help to illustrate a better approach, reasons why using economic models like ROI fall short, how to mix the three types of planning guidelines to ensure that assessment is meaningful, and actionable tips for creating effective surveys, emphasizing users' needs with a critical assessment framework.
