Electric Vehicles and the Future of Energy Efficient Transportation Subramaniam, Umashankar,Williamson, Sheldon S.,Krishna S., Mohan,J. L., Febin Daya,2021-04-16 The electric vehicle market has been gradually gaining prominence in the world due to the rise in pollution levels caused by traditional IC engine based vehicles The advantages of electric vehicles are multi pronged in terms of cost energy efficiency and environmental impact The running and maintenance cost are considerably less than traditional models The harmful exhaust emissions are reduced besides the greenhouse gas emissions when the electric vehicle is supplied from a renewable energy source However apart from some Western nations many developing and underdeveloped countries have yet to take up this initiative This lack of enthusiasm has been primarily attributed to the capital investment required for charging infrastructure and the slow transition of energy generation from the fossil fuel to the renewable energy format Currently there are very few charging stations and the construction of the same needs to be ramped up to supplement the growth of electric vehicles Grid

integration issues also crop up when the electric vehicle is used to either do supply addition to or draw power from the grid These problems need to be fixed at all the levels to enhance the future of energy efficient transportation Electric Vehicles and the Future of Energy Efficient Transportation explores the growth and adoption of electric vehicles for the purpose of sustainable transportation and presents a critical analysis in terms of the economics technology and environmental perspectives of electric vehicles The chapters cover the benefits and limitations of electric vehicles techno economic feasibility of the technologies being developed and the impact this has on society Specific points of discussion include electric vehicle architecture wireless power transfer battery management and renewable resources This book is of interest for individuals in the automotive sector and allied industries policymakers practitioners engineers technicians researchers academicians and students looking for updated information on the technology economics policy and environmental aspects of electric vehicles
