R. McNeill, Kenneth Pomeranz, 2015-04-30 Since 1750 the world has become ever more connected with processes of production and destruction no longer limited by land or water based modes of transport and communication Volume 7 of the Cambridge World History series divided into two books offers a variety of angles of vision on the increasingly interconnected history of humankind The first book examines structures spaces and processes within which and through which the modern world was created including the environment energy technology population disease law industrialization imperialism decolonization nationalism and socialism along with key world regions **Federalism and Public Health in India** Balveer Arora, Mohan Rao, 2025-01-30 The interface of public health and federalism are increasingly gaining scholarly attention in the fields of comparative federalism and welfare state studies This volume looks into various facets of public health and governance in India from a legal institutional and policy perspective The volume explores the regulatory architecture around healthcare in federal systems of governance public finance and insurance private sector in medical care and the tussle for power between the union and the states A multidisciplinary volume with essays from scholars working in public health economics political science and legal studies the book critically evaluates India s public policy apparatus dealing with health crises inequity and the lack of health infrastructure and resources among other challenges It also looks at the impact of the Covid 19 pandemic on federalism and democratic structures as well as the role of institutions such as the NITI Aayog and other central agencies in policy formulation and implementation within the broader framework of intergovernmental relations in a federal system The book will be of interest to students and researchers of public health public policy health administration medical sociology constitutional law and political science as well as of federalism **Birth controlled** Amrita Pande, 2022-06-14 Birth

controlled analyses the world of selective reproduction the politics of who gets to legitimately reproduce the future through a cross cultural analysis of three modes of controlling birth contraception reproductive violence and repro genetic technologies It argues that as fertility rates decline worldwide the fervour to control fertility and fertile bodies does not dissipate what evolves is the preferred mode of control Although new technologies like those that assist conception or allow genetic selection may appear to be an antithesis of other violent versions of population control this book demonstrates that both are part of the same continuum All population control policies target and vilify women Black women in particular and coerce them into subjecting their bodies to state and medical surveillance Birth controlled argues that assisted reproductive technologies and repro genetic technologies employ a similar and stratified burden of blame and responsibility based on gender race class and caste To empirically and historically ground the analysis the book includes contributions from two postcolonial nations South Africa and India examining interactions between the history of colonialism and the economics of neoliberal markets and their influence on the technologies and politics of selective reproduction The book provides a critical interdisciplinary and cutting edge dialogue around the interconnected issues that shape reproductive politics in an ostensibly post population control era The contributions draw on a breadth of disciplines ranging from gender studies sociology medical anthropology politics and science and technology studies to theology public health and epidemiology facilitating an interdisciplinary dialogue around the interconnected modes of controlling birth and practices of neo eugenics

The Movement for Global Mental Health William Sax, Claudia Lang, 2025-10-01 In *The Movement for Global Mental Health Critical Views from South and Southeast Asia* prominent anthropologists public health physicians and psychiatrists respond sympathetically but critically to the Movement for Global Mental Health MGMH They question some of its fundamental assumptions the idea that mental disorders can clearly be identified that they are primarily of biological origin that the world is currently facing an epidemic of them that the most appropriate treatments for them normally involve psycho pharmaceutical drugs and that local or indigenous therapies are of little interest or importance for treating them The contributors argue that on the contrary defining mental disorders is difficult and culturally variable that social and biographical factors are often important causes of them that the epidemic of mental disorders may be an effect of new ways of measuring them and that the countries of South and Southeast Asia have abundant though non psychiatric resources for dealing with them In short they advocate a thoroughgoing mental health pluralism

Law, Policy and Reproductive Autonomy Erin Nelson, 2014-07-18 Reproductive choices are at once the most private and intimate decisions we make in our lives and undeniably also among the most public Reproductive decision making takes place in a web of overlapping concerns political and ideological socio economic health and health care all of which engage the public and involve strongly held opinions and attitudes about appropriate conduct on the part of individuals and the state *Law Policy and Reproductive Autonomy* examines the idea of reproductive autonomy noting that in attempting to look closely at the contours of the

concept we begin to see some uncertainty about its meaning and legal implications about how to understand reproductive autonomy and how to value it Both mainstream and feminist literature about autonomy contribute valuable insights into the meaning and implications of reproductive autonomy The developing feminist literature on relational autonomy provides a useful starting point for a contextualised conception of reproductive autonomy that creates the opportunity for meaningful exercise of reproductive choice With a contextualised approach to reproductive autonomy as a backdrop the book traces aspects of the regulation of reproduction in Canadian English US and Australian law and policy arguing that not all reproductive decisions necessarily demand the same level of deference in law and policy and making recommendations for reform

State Intimacies Eva Fiks, 2024-04-01 The public healthcare system in rural India is chronically under resourced It embodies and often perpetuates the wider politics of the Indian state towards its rural communities with provisions of care that are deeply entangled with violence and disgust For rural women such care deepens reproductive chronicity while providing temporary relief Grounded in women's everyday realities and experiences in sterilization camps and other healthcare settings in rural Rajasthan State Intimacies examines the mundane workings ambiguities and fragilities of care in post colonial rural North India

The Palgrave Handbook of Infertility in History Gayle Davis, Tracey Loughran, 2017-09-01 This ground breaking interdisciplinary volume provides an overdue assessment of how infertility has been understood treated and experienced in different times and places It brings together scholars from disciplines including history literature psychology philosophy and the social sciences to create the first large scale review of recent research on the history of infertility Through exploring an unparalleled range of chronological periods and geographical regions it develops historical perspectives on an apparently transhistorical experience It shows how experiences of infertility access to treatment and medical perspectives on this condition have been mediated by social political and cultural discourses The handbook reflects on and interrogates different approaches to the history of infertility including the potential of cross disciplinary perspectives and the uses of different kinds of historical source material and includes lists of research resources to aid teachers and researchers It is an essential go to point for anyone interested in infertility and its history Chapter 19 is open access under a CC BY 4.0 license via link [springer.com](https://www.springer.com)

Discounted Life Sharmila Rudrappa, 2015-12-04 Sharmila Rudrappa interrogates the creation and maintenance of reproductive labor markets the function of agencies and surrogacy brokers and how women become surrogate mothers Is surrogacy solely a labor contract for which the surrogate mother receives wages or do its meanings and import exceed the confines of the market Rudrappa argues that this reproductive industry is organized to control and disempower women workers and yet her interviews reveal that by and large the surrogate mothers in Bangalore found the experience life affirming Rudrappa explores this tension and the lived realities of many surrogate mothers whose

deepening bodily commodification is paradoxically experienced as a revitalizing life development **Citizen Refugee** Udit Sen, 2018-08-30 This innovative study explores the interface between nation building and refugee rehabilitation in post partition India Relying on archival records and oral histories Udit Sen analyses official policy towards Hindu refugees from eastern Pakistan to reveal a pan Indian governmentality of rehabilitation This governmentality emerged in the Andaman Islands where Bengali refugees were recast as pioneering settlers Not all refugees however were willing or able to live up to this top down vision of productive citizenship Their reminiscences reveal divergent negotiations of rehabilitation from below Educated refugees from dominant castes mobilised their social and cultural capital to build urban squatters colonies while poor Dalit refugees had to perform the role of agricultural pioneers to access aid Policies of rehabilitation marginalised single and widowed women by treating them as permanent liabilities These rich case studies dramatically expand our understanding of popular politics and everyday citizenship in post partition India **Childbirth, Vulnerability and Law**

Camilla Pickles, Jonathan Herring, 2019-08-23 This book is inspired by a statement released by the World Health Organization directed at preventing and eliminating disrespectful and abusive treatment during facility based childbirth Exploring the nature of vulnerability during childbirth and the factors which make childbirth a site for violence and control the book looks at the role of law in the regulation of professional intervention in childbirth The WHO statement and other published work on mistreatment obstetric violence birth trauma birth rape and dehumanised care all point to the presence of vulnerability violence and control in childbirth This collected edition explores these issues in the experience of those giving birth and for those providing obstetric services It further offers insights regarding legal avenues of redress in the context of this emerging area of concern Using violence vulnerability and control as a lens through which to consider multiple facets of the law the book brings together innovative research from an interdisciplinary selection of authors The book will appeal to scholars of law and legal academics specifically in relation to tort criminal law medical law and human rights It will also be of interest to postgraduate scholars of medical ethics and those concerned with gender studies more broadly Contraception,

Colonialism and Commerce Sarah Hodges, 2017-03-02 Birth control holds an unusual place in the history of medicine Largely devoid of doctors or hospitals only relatively recently have birth control histories included tales of laboratory based therapeutic innovation Instead these histories elucidate the peculiar slippages between individual bodies and a body politic occasioned by the promotion of techniques to manipulate human reproduction The history of birth control in India brings these as well as additional complications to the field Contrary to popular belief India has one of the most long lasting institutionalized far reaching state sponsored family planning programs in the world During the inter war period the country witnessed the formation of groups dedicated to promoting the cause of birth control This book outlines the early history of birth control in India particularly the Tamil south In so doing it illuminates India s role in a global network of birth control advocacy The book also argues how Indians contraceptive advocacy and associationalism became an increasingly significant

realm of action in which they staked claims not just about the utility of contraception but simultaneously over their ability and right to self rule

Global Health Watch 2005-2006 ,2005 This alternative world health report offers a comprehensive survey of the key areas that influence the health of poor and vulnerable groups in all countries They range from climate change water and nutrition to national health policies and services and the brain drain of health professionals from South to North **Colonial**

Modernities Ambalika Guha,2017-07-20 The subject of medicalisation of childbirth in colonial India has so far been identified with three major themes the attempt to reform or sanitise the site of birthing practices establishing lying in hospitals and replacing traditional birth attendants with trained midwives and qualified female doctors This book part of the series *The Social History of Health and Medicine in South Asia* looks at the interactions between childbirth and midwifery practices and colonial modernities Taking eastern India as a case study and related research from other areas with hard empirical data from local government bodies municipal corporations and district boards it goes beyond the conventional narrative to show how the late nineteenth century initiatives to reform birthing practices were essentially a modernist response of the western educated colonised middle class to the colonial critique of Indian sociocultural codes It provides a perceptive historical analysis of how institutionalisation of midwifery was shaped by the debates on the women s question nationalism and colonial public health policies all intersecting in the interwar years The study traces the beginning of medicalisation of childbirth the professionalisation of obstetrics the agency of male doctors inclusion of midwifery as an academic subject in medical colleges and consequences of maternal care and infant welfare This book will greatly interest scholars and researchers in history social medicine public policy gender studies and South Asian studies *Family Planning*

Communication in India Shashwati Goswami,2023-09-08 This book is the first systematic study on the historiography of the family planning communication process in India It traces the history of the development of a highly technical health communication process It discusses how the discourse on India s population problem was at the heart of the development dialogue which was being promoted by the British colonial administration The book examines the role of the censuses and the Five Year plans in the development of the discussion on the population explosion in India Also it critically discusses the role of the Ford Foundation s leadership in institutionalising the communication process in India The book essentially argues that population control communication enabled the ideas of a homogenised nation an ideal Indian woman and an ideal Indian

family This in turn led to the obliteration of cultural ethnic geographical and economic specificities of India as a country The volume will be of great interest to scholars and researchers of public policy media and communication studies Indian politics modern Indian history and South Asian Studies
