Neijmann, 1997 This fascinating study explores a remarkable ethnic Canadian literature in close textual and contextual terms for the first time It lays a groundwork for future comparative research in the field of ethnic Canadian studies and challenges assumptions about cultural identity and human experience of the new *Demographic Engineering: Population Strategies in Ethnic Conflict* Paul Morland, 2016-05-23 Demography has always mattered in conflict but with conflict increasingly of an inter ethnic nature with sharper demographic differences between ethnic groups and with the spread of democracy numbers count in conflict now more than ever This book argues for and develops a framework for demographic engineering which provides a fresh perspective for looking at political events in countries where ethnicity matters It asks how policies have been framed and implemented to change the demography of ethnic groups on the ground in their own interests It also examines how

successful these policies have been focusing on the cases of Sri Lanka Israel Palestine Northern Ireland and the USA Often these policies are hidden but author Paul Morland teases them out with skill both from the statistics and documentary records and through conversations with participants Offering a new way of thinking about demographic engineering hard demography versus soft demography and how ethnic groups in conflict deploy demographic strategies this book will have a broad appeal to demographers geographers and political scientists Danish Emigration to the U.S.A. Nye, 2007 This volume celebrates the 40th anniversary of the journal *American Studies* in Scandinavia which began publication in 1967 The first of a series of books that will bring together the distinctive scholarship of the Nordic Association for American Studies it situates Scandinavian practices in relation to American Studies debates inside the US where for a decade scholars argued about the shape and subject matter of the field Is this a crisis in American Studies as a whole Or is the problem largely confined to the United States How is this interdisciplinary activity different in a Scandinavian context These questions ultimately are about the field's direction and international coherence *Beyond the crisis in US American Studies* is an invitation to develop a dialogue across the Atlantic For too long European scholars have watched Americanists in the United States as though looking through a one way window invisible to those arguing on the other side of the glass For too long US Americanists have scarcely realized that what appeared a mirror could be a window
