*From Wonder to Wisdom* Charles A. Smith, 1989      *A Comprehensive Guide to Child Psychotherapy and Counseling* Christiane Brems, 2008-03-19 Christiane Brems an experienced clinician supervisor and educator presents a metatheoretical yet practical guide to working with children ages 3 to 12 years She draws heavily on developmental interpersonal family systems and self psychological schools of thought and integrates the core components of all of these approaches in a clear and concise manner She stresses the need for intensive assessment to precede conceptualization and treatment planning so that treatment techniques are dictated by the needs of each child and family Brems has contoured the third edition to meet the practical needs and expectations of students and practitioners Divided among four sections the chapters follow the logical development of clinicians mirroring the natural flow of work with children from the practitioners self exploration to learning about special aspects of children such as diversity and development to awareness about the special needs and demands of children as related to environmental legal and ethical issues Brems prepares clinicians to discover their own personal traits that may facilitate or hinder their work with children She walks child therapists and counselors through the initial stages of intake assessment and conceptualization The material on assessment instruments is thoroughly updated discussions refer to the latest versions of instruments and if new instruments emerged that meet one of the purposes deemed essential to child treatment they are included The text contains case examples each illustrating a specific therapeutic technique

*Family Stories and the Life Course* Michael W. Pratt, Barbara H. Fiese, 2004-04-26 This edited book draws from work that focuses on the act of telling family stories as well as their content and structure The process of telling family stories is linked to central aspects of development including language acquisition affect regulation and family interaction patterns This book extends across traditional developmental psychology personality theory and family studies Drawing broadly on the epigenetic framework for individual development articulated by Erik Erikson as well as on conceptions of the family life cycle the editors bring together contemporary examples of psychological research on family stories and their implications for development and change at different points in the life course The book is divided into sections that focus on family stories at different points in the life cycle from early childhood and the beginnings of narrative skill through adolescence young adulthood midlife and then mature adulthood and its intergenerational meaning During each of these periods of the life cycle research focusing on individual development within an Eriksonian framework of ego strengths and virtues is highlighted The dynamic role of family stories is also featured here with work exploring the links between family process intergenerational attachment and storytelling Sociocultural theories that emphasize how such development is situated in the wider cultural context are also featured in several chapters This broad lifespan developmental focus serves to integrate the exciting diversity of this work and foster further questions and research in the emerging field of family narrative The book is intended primarily for researchers and advanced level students in the fields of developmental and

personality psychology as well as those in family studies and in gerontology It may also be of interest to those in the helping professions who are concerned with family therapy and family issues and may due to its content and illustrative material have appeal to a wider market of the lay public The chapters are written in a readily accessible style and the analyses are presented in a fairly non technical way Because family stories are charted across the lifespan it would be a suitable companion book to a more traditional lifespan textbook in certain courses *The Whole Story Handbook* Carol L.

Birch,2000 Birch storyteller children s librarian and teacher tackles the slippery topic of the difference between reciting a memorized story and telling it directly and engagingly to listeners The storyteller must know far more about the story than he or she tells In addition to her own infectious prose Birch provides a series of guided imagery exercises that walk the reader through the nuts and bolts of learning imagining a story from the inside out in order to be fully present in its telling
