Conceptualising Women's Working Lives

Wendy Patton, 2013-04-20 Theoretical work on the career development of women has travelled a journey from critique to creation Early work responded to and criticised a literature that focused on theorising male roles in a workplace that was conceptualised as providing vertical career paths primarily for middle class males More recently theorists are creating new constructions and frameworks to enable a more holistic understanding of career applicable to both women and men These constructions include broadening the discussion from women s careers to women s working lives This is the fifth book in the Sense Publishers Career Development Series It features the vibrant work of contributors from around the world writing in the field of women s working lives It emphasises the need to explore theoretical connections and understandings in order to facilitate a more holistic and inclusive understanding of women s working lives The writers in the current volume acknowledge the changing roles of women in both public and private spheres Women s roles in paid work are changing both in their nature and type of engagement In addition with an ageing population women s roles in care work are increasingly being extended from child care to aged care This book provides a history of theorising about women s careers in addition to presenting a focus on current empirical and theoretical work which contributes to understandings of women s working lives It s contributions both map the current discourse and challenge future work to extend the boundaries of that discourse

Understanding and Supporting Law Enforcement Families Robert P. Delprino, 2017-12-27 Understanding and Supporting Law Enforcement Families through a synthesis of the research literature presents and explores some of the challenges faced by police families as well as developments that have taken place to support them in balancing family and work life There are demands and requirements from the job over which family members have little control Shift work

negative public perceptions of law enforcement changes in the officer's personality as well as living with the potential that their loved one may be injured or killed are among the unique challenges law enforcement families face. These extraordinary life events are discussed as well as the potential physical and psychological reactions to these stressors. In addition to an overview of support programs and services, specific resources from national organizations are provided on support for family members of an officer killed in the line of duty and organizational policies for the funeral of an officer who commits suicide and officer domestic violence. This book examines the existing research as a means to clarify issues faced by law enforcement families and discusses the availability of resources to provide the support these families need and deserve. A great deal of realizing that potential will be dependent upon actively including the law enforcement family in all aspects of the support process. It is not a conventional self-help book but intended for researchers, practitioners, students, and others with interest in the study and support of law enforcement families.

Innovations in Child and Family Policy Emily M. Douglas, 2010-02-08. Innovations in Child and Family Policy tackles many of the common problems and challenges that are considered to be at the heart of child and family policy: family creation, economic support, childrearing, and family care. Giving Innovations begins by defining child and family policy and discussing the history of this growing specialization within the social sciences. The main chapters of Innovations address policy and programmatic solutions to problems that face families by topic area: 1 early childhood and education; 2 government interventions with family violence, children's welfare, and the justice system; and 3 supports for children and families. Specifically, the chapters in Innovations address the availability of child care, family medical leave, special needs children, parent involvement in their children's education, preventing and addressing child abuse and neglect, children who witness partner violence, child support orders, children of incarcerated fathers, and young adults in the justice system. What makes this book unique is that it contains applied research from many program evaluations or assessments of existing state level legislation. Social scientists from multiple disciplines examine the efficacy of such programs and policies to make recommendations for expanded or new child and family policies. For our novice and/or student readers, we hope that Innovations will help them to develop a greater sense of what academics, professionals, and politicians mean when they speak of child and family policy, and also an appreciation for how social science research can contribute to policy making to support children and families. For our more advanced readers, we hope that these chapters make a significant contribution to the conversations regarding how multidisciplinary social science research can inform policy recommendations. For all of our readers, we hope that the use-inspired research presented in Innovations will help to strengthen and support the work we

Generational Diversity at Work Emma Parry, 2017-09-29 Over the past decade much attention has been paid to the apparent differences in consumption preferences or workplace attitudes and behaviours across generations Within Western economies such as the USA UK and Australia it is commonly assumed that that there are now four generations in the workplace namely Veterans born 1925 1942 Baby Boomers 1943 1960 Generation X 1961 1981 and Generation Y 1982 2000 The concept of generational differences at work is one that has recently been adopted by practitioners as a basis on which to design human resource management and career management practices However there has been some concern in academic circles about the validity of the notion of generations and the evidence base that supports it There is therefore a need for new perspectives and methodological approaches to investigating generational differences at work in order to establish the validity and value of generations as an axis of diversity *Generational Diversity at Work* New Research Perspectives will address this need by presenting and discussing research into generational diversity that adopts a range of new theoretical perspectives or methodological approaches This book is designed as a first step in addressing the need to critically examine the theoretical and empirical basis for generational differences and to provide some new empirical data in this area
