ontology and metaphysics In this new scenario respect for other historical systems worldviews and social accountability appear to be prominent Being ethical in archaeological terms in the multicultural context has become mandatory so much that most professional international and national archaeological associations have ethical principles as guiding forces behind their openness towards social sectors traditionally ignored or marginalized by their practices This powerful new ethics its newness is based to a large extent in that it is the first time that archaeological ethics is explicitly stated as if it didn t exist before emanates from metropolitan centers only to be adopted elsewhere In this regard it is worth probing the very nature of the dominant multicultural ethics in disciplinary practices because a it is at least suspicious that at the same time archaeology has tuned up with postmodern capitalist market needs and b the discipline along with its ethical principles is contested worldwide by grass roots organizations and social movements Can archaeology have socially committed ethical principles at the same time that it strengthens its relationship with the market and capitalism Is this coincidence just merely haphazard or does it obey more structural rules The papers in this book try to answer these two questions by examining praxis based contexts in which archaeological ethics unfolds **Remains of the Past in Old English Literature** Jan-Peer Hartmann,2025-02-11 Argues for a new understanding of Old English responses to materiality and historical change Human communities have interacted with the material remains of earlier periods for millennia Such archaeological objects including bones coins weapons building materials and architectural landmarks were physically handled reused transformed and reinterpreted they were also depicted in literature This book examines how Old English texts imagine such human encounters with the remnants of the past It explores Elene s perspective on the discovery of the True Cross as a narrative of political spiritual and epistemic translatio and the multiple ways in which The Wanderer and The Ruin use images of ruins and the poetic formula work of giants to construct an unknown and unrecoverable past it also considers the engagements with untimely objects in Beowulf and the Anonymous Old English Legend of the Seven Sleepers and how the Ruthwell Cross Poem and The Dream of the Rood play off figural against literal history As this study demonstrates Old English texts combined and creatively adapted a broad variety of ways of conceptualizing not merely history but indeed the very processes by which historical thought operates Its careful readings show that these texts not only display a deep and conflicted understanding of the philosophical implications of viewing history and temporality through the prism of material objects but also exhibit a powerful capacity for expressing such an understanding through aesthetic strategies **Staging the Past** Judith Schlehe,Michiko Uike-Bormann,Carolyn Oesterle,Wolfgang Hochbruck,2014-03-15 Popular representations of history are taking on new forms and reaching wider audiences The search for usable pasts is branching out into active appropriations of history such as historical theme parks housing developments and live action role play Drawing on themed environments across the continents the articles in this volume focus on how these appropriations bypass are different from or even contradict traditional as well as scientific modes of disseminating historical knowledge Bringing together theorists and

practitioners they provide the basis for an interdisciplinary as well as a transcultural theory of how pasts are staged in various social contexts **Prehistoric Europe** Andrew Jones,2008-11-10 Prehistoric Europe Theory and Practice provides a comprehensive introduction to the range of critical contemporary thinking in the study of European prehistory Presents essays by some of the most dynamic researchers and leading European scholars in the field today Ranges from the Neolithic period to the early stages of the Iron Age and from Ireland and Scandinavia to the Urals and the Iberian Peninsula

Antiquarianisms Benjamin Anderson,Felipe Rojas,2017-05-31 Antiquarianism and collecting have been associated intimately with European imperial and colonial enterprises although both existed long before the early modern period and both were and continue to be practiced in places other than Europe Scholars have made significant progress in the documentation and analysis of indigenous antiquarian traditions but the clear cut distinction between indigenous and colonial archaeologies has obscured the intense and dynamic interaction between these seemingly different endeavours This book concerns the divide between local and foreign antiquarianisms focusing on case studies drawn primarily from the Mediterranean and the Americas Both regions host robust pre modern antiquarian traditions that have continued to develop during periods of colonialism In both regions moreover colonial encounters have been mediated by the antiquarian practices and preferences of European elites The two regions also exhibit salient differences For example Europeans claimed the antiquities of the eastern Mediterranean as part of their own classical heritage whereas they perceived those of the Americas as essentially alien even as they attempted to understand them by analogy to the classical world These basic points of comparison and contrast provide a framework for conjoint analysis of the emergence of hybrid or cross bred antiquarianisms Rather than assuming that interest in antiquity is a human universal this book explores the circumstances under which the past itself is produced and transformed through encounters between antiquarian traditions over common objects of interpretation
