Sand Dunes of the Northern Hemisphere Qi Lu, Mahesh K. Gaur, Victor R. Squires, 2023-03-10 This book in two volumes and with a foreword by the renowned Professor M A J Williams draws on evidence from coastal and inland regions including desert dunes wind blown dust river and lake sediments glacial moraines plant and animal fossils isotope geochemistry soils and prehistoric archaeology to better understand the genesis and development of dunes systems in selected northern hemisphere sand dunes from Asia Africa and the Middle East regions The collection of research papers and case studies that are presented in this book provide the reader with a wealth of information about the distribution and types of sand dunes and an insight into the complexity of sand dune formation migration and management Research in many countries across the northern hemisphere shows that dunes whether coastal or inland are under pressure around the world Much of the pressure comes from human activities and the anthropogenic disturbance when coupled with global warming and alterations to the amount frequency and temporal distribution of precipitation could lead to more serious management challenges in the future There is much that we still need to find out about the origin genesis and development of sand dunes so that they can be managed better The difficult and complex questions being repeatedly raised can be answered only by interdisciplinary endeavours Geomorphologists geologists palaeontologists climatologists ecologists and others can work together on research projects that better define the origin evolution and development of dunes both inland and along the coasts Many chapters in this book attempt to reconstruct past climatic changes in deserts and their margins at a variety of scales in space and time in the expectation that such information might assist in preparing us for future global warming and drying

The Physical Geography of Northern Eurasia Maria Shahgedanova, 2003 This is the third volume in The Oxford Regional Environments series The series volumes are devoted to major regions of the world each presenting a detailed and up to date body of scientific knowledge concerning a particular region For most topics on the physical geography of Northern Eurasia abundant literature now exists Most of it however is in Russian and other East European languages and this has significantly limited the number of potential readers This volume seeks to familiarize at an international level those with an interest in this area with the most significant achievements in classical and current geographical research The Physical Geography of Northern Eurasia covers most of the territory of the former USSR The first section discusses the individual components of the physical environment These chapters cut across regional boundaries and treat the area discussed as a whole A regional analysis follows mainly in the context of geographical zonation though a

number of specific regions are given individual treatment The concluding chapters discuss the effects of anthropogenic activities on the physical environment The approach is an integrative one tying together various aspects of the physical environments with the environmental implications of human activities Every component of the environment is treated as a step in the development of the multi faceted landscapes which in turn provide possibilities and limitations for cultural and economic usage
