Sport: Race, Ethnicity and Identity Daryl

Adair, 2013-09-13 Sport has long been a paradoxical environment with respect to issues of race ethnicity and identity For much of the twentieth century sports around the world were enclaves of difference Whites and non whites for example were separated on the sports field as they were in many ways off the field Today sport is much more inclusive with athletic ability of greater importance than skin colour or ancestry Yet enmity and antagonism still appear in sport via instances of racial vilification or hostility between some groups Other problems include the relative absence of minorities from positions of power and influence in sport as well as folkloric assumptions about athletic ability based upon stereotypes about race or ethnic background This book discusses issues of diversity capacity and equity in the colourful world of global sport A panoramic approach covering race ethnicity and identity is consistent with the contemporary global migration of professional athletes as well as the multicultural contexts of sport in various regions This collection of essays therefore addresses international dimensions of sport commonality and difference as well as the special circumstances of sport and social relations in particular places This book was previously published as a special issue of *Sport in Society* *Postcolonial Literature* Pramod K. America's Other Automakers

Timothy J. Minchin, 2021-04 In 2018 almost half of all vehicles made in North America were produced at foreign owned plants and the sector was on track to monopolize the market Despite this the industry has been overlooked compared with its domestic counterpart both in scholarship and popular memory Redressing this neglect America's Other Automakers provides a new history of the foreignowned auto sector the first to extensively draw on archival sources and to articulate the human agency of participants including workers managers and industry recruiters Timothy J Minchin challenges the view that the industry's growth primarily reflected incentives stressing human agency and the complexity of individual stories instead Deeply human in its approach the book also explores the industry's impact on grassroots communities showing that it had more costs than supporters acknowledged Drawing on a wide range of primary and secondary sources America's Other Automakers uncovers significant tensions over unionization reports of discriminatory hiring and unease about the industry's rapid growth critically exploring seven large assembly facilities and their impact on the communities in which they were built The Neighborhood of Gods William

Elison, 2018-12-10 There are many holy cities in India but Mumbai is not usually considered one of them More popular images of the city capture the world's collective imagination as a Bollywood fantasia or a slumland dystopia Yet for many if not most people who live in the city the neighborhood streets are indeed shared with local gods and guardian spirits In *The Neighborhood of Gods* William Elison examines the link between territory and divinity in India's most self consciously modern city In this densely settled environment space is scarce and anxiety about housing is pervasive Consecrating space first with impromptu displays and then eventually with full blown temples and official recognition is one way of staking a claim But how can a marginalized community make its gods visible and therefore powerful in the eyes of others The

Neighborhood of Gods explores this question bringing an ethnographic lens to a range of visual and spatial practices from the shrine construction that encroaches on downtown streets to the tribal art practices of an indigenous group facing displacement to the work of image production at two Bollywood film studios A pioneering ethnography this book offers a creative intervention in debates on postcolonial citizenship urban geography and visibility in the religions of India **The**
