Front Garden New Approaches To Landscape Design:

The Front Garden Mary Riley Smith, 2001-02-27 The front yard is the stepchild of landscape design ignored in the current enthusiasm for gardening Typically with its high maintenance lawn and overgrown foundation planting the front yard doesn't enhance the house or provide useful living space for the homeowner Yet as new properties become smaller and old ones grow shadier the front garden may be the best place to grow vegetables or flowers to sit outside in comfort and privacy or even to swim or play tennis Mary Riley Smith a landscape designer who has often dealt with poorly planned and underused front properties has filled this book with creative ways to make your own front garden beautiful and functional She shows how to design paths driveways and parking areas and how to camouflage unattractive but necessary structures For privacy she describes the different virtues of fences clipped hedges and loose flowing hedgerows When it comes to planting in front of the house the choices are surprising instead of a lawn you might create a colorful cottage garden an edible landscape a drought tolerant meadow of regional native plants a sea of ornamental grasses or even a romantic orchard All of these landscapes and dozens more from all parts of the country are illustrated with beautiful photographs THE FRONT GARDEN concludes with nine case histories including the landscape designers plans that will give you even more ideas for turning your front yard into a beautiful garden

New Approaches for Sustainable & Resilient Processes and Products of Social Housing Development in the Arabian Gulf Countries Khaled Galal Ahmed,Mohamed H. Elnabawi Mahgoub,Lindita Bande,Martin Scoppa,2023-10-16 Social housing has been a forefront research topic especially from its economic and socio cultural factors The nature of social

housing in the Arabian Gulf Countries has been distinctive in its approach with usually generous areas and urban sprawl designs. Recently most of these Arabian Gulf Countries have gone through profound transformation in their social and housing paradigms influenced by their sustainability adopted agendas. Still scholarly documentation and analysis of the processes and products of these transformed paradigms are largely missing or at least fragmented. So there is a desperate need to boost research work in this field as related to each city country in this region with largely expected mutual effects that these experiences might have on each other and on the global debate about sustainable and resilient social housing as a whole.
