**The Informal Economy in Developing Countries** Jean-Pierre Cling, Stéphane

Lagrée, Mireille Razafindrakoto, François Roubaud, 2014-08-21

Informality is ubiquitous in most developing countries Understanding the informal economy is therefore of utmost importance from a political economic and social point of view Paradoxically despite its economic importance knowledge is extremely limited regarding the informal economy It remains largely unrecognized by researchers is neglected by politicians and is even negatively perceived as it is meant to disappear with development This book aims to amend this situation by presenting recent high level research which studies the informal sector and informal employment Fresh research into this subject is presented through empirical analysis which covers Asia Africa and Latin America Each chapter relies on data and a detailed knowledge of the context of the countries studied in order to question the dominant schools of thought on the origins and causes of informality The results provide interesting insights into the constraints faced by informal workers the dynamics of the informal economy and its link with poverty issues On the basis of the evidences provided by results adequate policies could be defined to address informality issues The principal characteristics of the informal sector testify to some profound similarities between developing countries low qualifications and the precariousness of jobs mediocre incomes and working conditions atomization of production units and lack of articulation with the formal economy etc This general statement does not contradict the observation that there is a high level of heterogeneity in the sector and in informal employment within each country confirmed by several chapters in this work In the absence of a sufficient number of job creations the informal sector essentially constitutes a refuge for workers seeking and is here to stay in the short and medium term even in emerging countries

**International Journal of Development Research and Quantitative Techniques: Vol.1, No.2 , Contract Farming and the Development of**

*Smallholder Agricultural Businesses* Joseph A. Kuzilwa, Niels Fold, Arne Henningsen, Marianne Nylandsted Larsen, 2017-08-24

Contract farming has received renewed attention recently as developing economies try to grapple with how to transform the agricultural sector and its associated value chains This book examines different contract arrangements for selected crops applying both qualitative and quantitative approaches in order to examine how contract farming affects smallholders and value chain dynamics in Tanzania Major themes covered in the book include contract farming policy contract farming and value chain dynamics contract farming adoption decisions contract farming and income diversification The authors also discuss alternative aspects of contract farming such as trust conspiracy empowerment and corporate social responsibility The book presents original research from case studies conducted in Tanzania on sugarcane tobacco sunflower and cotton These crops have a history of trials and errors with contract farming involving smallholders Furthermore they are targeted in national strategies as some of the main crops for establishment and upgrading of agro industrial activities in Tanzania
