Democratization examines China's transformation from an institutional perspective. It proposes an analytical framework comprising six macro institutional environments: international, ideological, political, economic, constitutional, and civil social, to analyze the Chinese transition. Through an institutional analysis of the ruling elite's policy institutionalization, it tries to answer three main questions: Will China's economic reforms lead to a meaningful political reform? Will economic freedom lead to political freedom? Will economic development lead to political democratization? The major findings from the institutional analysis of the dynamic interactions between political actors and institutions suggest that China is moving closer towards democracy. Students and scholars who are studying or conducting researches on the Chinese economy, society, or politics will find this book of particular interest.

This volume describes the historical process and characteristics of the economy since 1949, then looks into the momentum and inner logic that underpin the economic development. The former part covers issues of agriculture, industry, population, and labor force; urbanization and mobility; income distribution and poverty; and price changes. The latter part includes analyses on the capital formation, human resources, technological progress, institutions, macro policies, international trade, and direct investment. Chinese Economic Development Yinxing Hong, Ninghua Sun, 2021-07-08. The book provides a meticulous analysis of economic development and concomitant problems in China since the late 1970s and advances suggestions on further economic modernisation and transition from both theoretical and practical angles. Based on theories from development economics and solid empirical studies, the authors, two renowned Chinese economists, provide a perceptive analysis of the Chinese development model in the post-Mao era. They shed light on questions that have perplexed many: How can China sustain the rapid growth of the past 40 years? Is there a unique China path to economic progress? They argue compellingly that China's development model has to switch from a manufacturing-driven one to a brand new approach centring on scientific and technical innovation and the integration of its existing economic structure into an increasingly complex global economy. Such transformation will help overcome the middle income trap while addressing other institutional and economic challenges. The book will appeal to students, scholars, and policymakers interested in the Chinese and global economies, as well as transnational studies in the post-COVID-19 world. General readers willing to obtain a grasp of Chinese

economic development from the insider's perspective will also find it useful

Thoughts on Economic Development in China Ma Ying, Ying Ma, Hans-Michael Trautwein, 2013 This book is about mutual influences of thinking about economic development in China and in the West from the 18th century until the present. Its chapters are contributed by development economists and historians of thought from China and other parts of the world. The book describes important stages in the evolution, cross-fertilization and contextual modification of ideas about economic order, development and institutional change. It illustrates how Western concepts and theories have been adopted and adapted to Chinese conditions in different waves of modernization from the late 19th century until the present and that this was and is no one-way traffic. The book describes how pre-classical thinking in the West, in particular French Physiocracy in mid-18th century, was influenced by China as an ideal and a source of ideas at a time when China was the largest and most advanced economy in the world. It discusses to what extent concepts of Western-style economics, in particular in the fields of development economics and institutional economics, can be used to understand the rapid transitions and developments of the Chinese economy in recent decades and to what extent they might need to be modified in the light of new experiences and insights. Against this background, several contributions to the volume provide assessments of the current state of economic science and teaching in China, in particular with regard to Chinese views on Western economics. The book should be of interest to those who are interested in economic development and the history of economics in China.

Demystifying China's Economy Development Fang Cai, 2015-06-02 This book explains why China's opening-up policy can boost the rapid growth of its economy. Based on concrete facts and economic logic, it offers a brief introduction to the history of China's successful development, which has unprecedentedly helped improve people's lives and community welfare over the past 30 years. In light of the newly emerging problems, the author assesses the different stages of China's economic development and new challenges, illustrating how the country's sustainable growth could be achieved through further reforms so as to complete the transition from a middle-income to high-income country. He moves on to discuss the lessons learned from China's experiences and summarizes their significance for other developing countries, while also clarifying popular misconceptions such as the China Menace and Theory of China's Collapse. Taking the logic of economic development as a basis and employing economic norm analysis methods, the book describes China's economic miracle in plain but vivid language and attempts to enrich the economic development theory through China's experience.
