Routledge Handbook of Macroeconomic Methodology Jesper Jespersen, Victoria Chick, Bert Tieben, 2023-06-20 The present macroeconomic crisis has demonstrated that a deeper understanding of the importance of relevant macroeconomic theories and methods is wanting Additionally lack of methodological awareness is behind much of the disagreement within macroeconomics which looked upon from outside often appears incomprehensible The Handbook gives a structured presentation of the study of principles and procedures by which macroeconomics is researched taught and communicated both within academia and to a wider audience and why specific theories research strategies and teaching are preferred The principles of selecting theory relevant to real world problems are the core of methodology This book contains a broad range of arguments behind theory construction and appraisal and the consequences of these choices within the field of macroeconomics An international range of experts provide clear analysis of key concepts ideas and principles to give academics students and others a better understanding of the macroeconomics behind policy conclusions which are put forward at different levels Essays on Philosophy and Economic Methodology Daniel M. Hausman, 1992-11-27 This collection brings together the essays of one of the foremost American philosophers of economics Cumulatively they offer fresh perspectives on foundational questions such as what sort of science is economics and how successful can economists be in acquiring knowledge of their subject matter Handbook of Experimental Economic Methodology Guillaume R. Fréchette, A. Schotter, 2015 The Handbook of Experimental Economic Methodology edited by Guillaume R Fr chette and Andrew Schotter aims to confront and debate the issues faced by the growing field of experimental economics For example as experimental work attempts to test theory it raises questions about the proper relationship between theory and experiments As experimental results are used to inform policy the utility of these results outside the lab is questioned and finally as experimental economics tries to integrate ideas from other disciplines like psychology and neuroscience the question of their proper place in the discipline of economics becomes less clear This book contains papers written by some of

the most accomplished scholars working at the intersection of experimental behavioral and theoretical economics talking about methodology It is divided into four sections each of which features a set of papers and a set of comments on those papers The intention of the volume is to offer a place where ideas about methodology could be discussed and even argued Some of the papers are contentious a healthy sign of a dynamic discipline while others lay out a vision for how the authors think experimental economics should be pursued This exciting and illuminating collection of papers brings light to a topic at the core of experimental economics Researchers from a broad range of fields will benefit from the exploration of these important questions
