Economic Policies For The New Hungary Proposals For A Coherent Approach:

Economic Policies for the New Hungary Otto Hieronymi,1990 **Globalization and the Reform of the International Banking and Monetary System** O. Hieronymi,2009-11-04 The book argues that a successful monetary and banking reform requires a rollback of monetary nationalism and return to monetary internationalism trust in the banking system with its basic functions restored a balance between competition and solidarity in order to assure political and social acceptance of globalization *Efficiency Issues in Transitional Economies* Jenifer Piesse,2018-09-28 Published in 1999 this text uses a number of approaches to measure the performance of firms in the transition economies of Central Eastern Europe during the early stages of reform There is considerable controversy about the level of productivity in this period as is evident by contradictory evidence quoted in the literature and a high degree of inconsistency in published national statistics Indeed the disagreement extends to the measurement approach and the results for this group of countries Particularly difficult is any analysis at the firm level as data is inconsistent incomplete and based on now out dated accounting systems The information used in this book is a panel data set of 64 items collected from 1000 firms across 25 industry sectors in Hungary Productive efficiency is measured and the reasons for poor performance are discussed It was found that industrial sectors differ in their average performance levels and in the factors most likely to account for this Finally recommendations are developed to help to reverse the decline in productivity **The Political Economy of Hungary** Adam Fabry,2019-04-03 This book explores the political economy of Hungary from the mid 1970s to the present Widely considered a poster boy of neoliberal transformation in post communist Eastern Europe until the mid 2000s Hungary has in recent years developed into a model illiberal regime Constitutional checks and balances are non functioning the independent media trade unions and civil society groups are constantly attacked by the authorities there is widespread intolerance against minorities and refugees and the governing FIDESZ party led by Prime Minister Viktor Orb n controls all public institutions and increasingly large parts of the country s economy To make sense of the politico economical roller coaster that Hungary has experienced in the last four decades Fabry employs a Marxian political economy approach emphasising competitive accumulation class struggle both between capital and labour as well as different fractions of capital and uneven and combined development The author analyses the neoliberal transformation of the Hungarian political economy and argues that the drift to authoritarianism under the Orb n regime cannot be explained as a case of Hungarian exceptionalism but rather represents an outcome of the inherent contradictions of the variety of neoliberalism that emerged in Hungary after 1989 **Global Monetary and Economic Convergence** Gusztáv Báger,Miklós Szabó-Pelsóczy,2018-12-21 Published in 1998 Global convergence has many aspects The first part of this volume deals with European convergence the second with convergence especially between Eastern and Western Europe The third part with practical and the fourth with theoretical issues related to Global Convergence The last part juxtaposes Hayekian and Triffian economic thought The first of these the Hayekian relies

exclusively on the profit motive of the only arbiter of the economic decision making The Triffians thought insists that satisfactory balances can be brought about only through racial negotiation among market participants within countries and on a global scale The Hayek Triffin juxtaposition gains particular importance at a time when capital mobility labour and social mobility have reached hitherto new levels on a global scale and this challenges social coherence This difference will put social coherence under unusual stress The solution of the problems created will be the greatest challenge to economic social and political statemanship during the 21st century Problems of Communism ,1992-05 **Current**

Bibliographical Information Dag Hammarskjöld Library,1991 *Managing the Transition* Eric Rice,1991 The consensus of dozens of Bank and outside experts on issues and measures essential to government reform in six Eastern European economies changing to a market economy and on how external agencies can best aid the reform process **Privatization and the Rebirth of Capital Markets in Hungary** C. Edward Fletcher,1995 The Republic of Hungary has emerged as the leader in capital market reforms among former Soviet Bloc countries Since 1982 the country has made significant strides towards the privatization of its economy and the implementation of market regulations serving as a model for other formerly socialist countries The progress and mistakes of the Hungarian movement towards capitalism are studied here as a model for reforms in other countries in Eastern Europe Particular emphasis is placed on the legal and regulatory structures that have been established to facilitate the transition Banking reforms development of the Budapest Stock Exchange stabilization of the forint and many other interrelated reforms that are an integral part of Hungary s capital market infrastructure are also examined Current Politics and Economics of Europe ,1991 *Bibliographie Mensuelle.
