discussion concerning appropriate reading material for courses in economic psychology The discussion took place a few years ago in the Department of Economic Psychology at Tilburg University The Netherlands It was noted that there was a surprising lack of collections of pertinent readings to say nothing about the lack of textbooks in the English language So the present editors who had been involved in the discussion decided to start working on a Handbook The situation has changed quite a lot since then There are now a number of books internationally available in the English language in economic psychology or behavioral economics The interest in this field of study is expanding quite impressively The Journal of Economic Psychology is now 1988 in its ninth volume and many other journals are publishing articles in the field The application of psychological theories and methods to economic problems or the study of economic experiences and behavior is variously referred to as economic psychology or behavioral economics While in principle we do not want to overdo the differences between the two we have a feeling that economic psychology has a slightly stronger flavor of psychology than behavioral economics which in its turn seems to be closer to economics Psychologists tend to feel more at home in economic psychology while economists seem to favor behavioral economics Economics and Modern Psychology ...
