Ecology Of Freedom The Emergence And Dissolution Of Hierarchy:

The Ecology of Freedom Murray Bookchin, 1991 The Ecology of Freedom his most exciting and far reaching work yet This engaging and extremely readable book s scope is downright breathtaking Using an inspired synthesis of ecology anthropology philosophy and political theory it traces our society s conflicting legacies of freedom and domination from the first emergence of human culture to today s global capitalism The theme of Bookchin s grand historical narrative is straightforward environmental economic and political devastation are born at the moment that human societies begin to organize themselves hierarchically And despite the nuance and detail of his arguments the lesson to be learned is just as basic our nightmare will continue until hierarchy is dissolved and human beings develop more sane sustainable and egalitarian social structures The Ecology of Freedom is indispensable reading for anyone who s tired of living in a world where everything and everyone is an exploitable resource It includes a brand new preface by the author Book jacket *The Ecology of Freedom* Murray Bookchin, 2005 Indispensable reading for anyone who is tired of living in a world where everything and everyone is an exploitable resource Murray Bookchin uses an inspired synthesis of ecology anthropology philosophy and political theory to trace the human race s conflicting legacies of freedom and domination from the emergence of human culture to today s global capitalism **Local Natures, Global Responsibilities** Laurenz Volkmann, 2010 Laurenz Volkmann is Professor of EFL Teaching at Friedrich Schiller University Jena where Nancy Grimm and Katrin Thomson also teach Ines Detmers is a lecturer in English literature at the Technical University of Chemnitz Book Jacket [Social Ecology After Bookchin](#) Andrew Light, 1998-01-01 For close to four decades Murray Bookchin s eco anarchist theory of social ecology has inspired philosophers and activists working to link environmental concerns with the desire for a free and egalitarian society New veins of social ecology are now emerging both extending and challenging Bookchin s ideas For this instructive book Andrew Light has assembled leading theorists to contemplate the next steps in the development of social ecology Topics covered include reassessing ecological ethics combining social ecology and feminism building decentralized communities evaluating new technology relating theory to activism and improving social ecology through interaction with other left traditions **Eden and the Fall - the Fallacies of Radical Ecological History**, 1999 Radical ecology claims to be a new movement at the cutting edge of social change offering a solution to current social and ecological problems through the rejection of reformist ecological politics in favour of a radical restructuring of industrial and especially Western society The claim to have discovered the historical cause of current ecological and social problems plays a key role in validating this radical approach Although numerous interpretations of the historical origins of existing social and ecological problems exist within radical ecology three main variants have been identified This thesis critically examines the three main variants of radical ecological history the belief in primal harmony the belief in the civilisation of the goddess and its destruction by a Kurgan invasion and the view that the rise of capitalism and the mechanistic world view was responsible for the ecological

and social crises of today In so doing it also examines a number of key questions central to radical ecological history when did violence and hierarchy begin in human history is it possible to argue that today s ecological crisis has a religious cause and can the scientific technological and commercial revolutions be truly described as purely Western phenomena The main findings of this thesis are that each of these variants of radical ecological history is chronically flawed In addition to numerous empirical errors each of these historical interpretations is based on an extremely simplistic Eurocentric reading of the past based on the use of archetypal stereotypes of good and evil that have little or no historical foundation While these interpretations of history vary profoundly they are all based on the same underlying model of history whose origins lie in the Judeo Christian apocalyptic tradition and ultimately in Zoroastrianism While some of the flaws of radical ecological history are a result of poor scholarship it is argued that it is the use of t

A Political Theology of Nature Peter Scott,2003-03-06 This book argues that the modern separation of humanity from nature can be traced to the displacement of the triune God Locating the source of our current ecological crisis in this separation Peter Scott argues that it can only be healed within theology through a revival of a Trinitarian doctrine of creation interacting with political philosophies of ecology Drawing insights from deep ecology ecofeminism and social and socialist ecologies Scott proposes a common realm of God nature and humanity Both Trinitarian and political the theology of this common realm is worked out by reference to Christ and Spirit Christ s resurrection is presented as the liberation and renewal of ecological relations in nature and society the movement of the Holy Spirit is understood as the renewal of fellowship between humanity and nature through ecological democracy and the Eucharist is proposed as the principal political resource Christianity offers for an ecological age

struggles over national self determination European colonialism and racism and how to view Berlin s controversial distinction between so called negative liberty and positive liberty By relating Berlin s thinking about freedom to competing contemporary views of the politics of freedom this book will be significant for both scholars of Berlin as well as people who are interested in larger debates about the meaning and conditions of freedom Alternatives Unincorporated George Zachariah,2015-01-30 The victims of environmental destruction are often sidelined in eco theology and environmental discourse Movements for ecological justice fail to take into account the voice of those at the grassroots Alternatives Unincorporated presents an environmental ethics that begins with those on the margins Using the key example of the Narmada Dam in India and the popular resistance movement which built up against the project the book examines the collective action of subaltern communities in caring for their local environment The book frames these movements as theological texts that inform a life affirming earth ethics The aim of the book is to challenge prevailing social and ecological dynamics and to affirm the interconnectedness of social justice and environmental action **Lost in Space** Rob Kitchin,James Kneale,2005-12-23 Science fiction one of the most popular literary cinematic and televisual genres has received increasing academic attention in recent years For many theorists science fiction opens up a space in which the here and now can be made strange or remade where virtual reality and cyborg are no longer gimmicks or predictions but new spaces and subjects Lost in space brings together an international collection of authors to explore the diverse geographies of spaceexploring imagination nature scale geopolitics modernity time identity the body power relations and the representation of space The essays explore the writings of a broad selection of writers including J G Ballard Frank Herbert Marge Piercy Kim Stanley Robinson Mary Shelley and Neal Stephenson and films from Bladerunner to Dark City The Fly The Invisible Man and Metropolis Looking Beyond the Structure Dan Bucsescu,Michael Eng,2009-11-20 In Looking Beyond the Structure architect Dan Bucsescu and philosopher Michael Eng record their conversations about the relationship of the built environment and other forms of design to the culture in which they are created The authors exchange their interpretations of selected readings about design theory and invite the reader to join in the discussion Questions following each chapter s reading stimulate critical thinking about the philosophies and theories of design and additional assignments encourage students to express their critical thinking skills visually People-Plant Relationships Raymond P Poincelot,Joel Flagler,2018-05-04 Presenting the latest research on cross cultural people plant relationships this volume conveys the psychological physiological and social responses to plants and the significant role these responses play in improved physical and mental health With chapters written by field experts it identifies research priorities and methodologies and outlines the steps for developing a research agenda to aid horticulturalists in their work with social scientists to gain a better understanding of people plant relationships This resource covers a wide array of topics including home horticulture and Lyme disease indoor plants and pollution reduction and plants and therapy **Future Survey Annual 1987** Michael

Marien,1988-01-01 **From Urbanization to Cities** Murray Bookchin,2021-11-01 In this far reaching work social ecologist and historian Murray Bookchin takes the reader on a voyage through the evolution of the city Cities are not just monumental social and political facts they are tremendous ecological facts as well Far from seeing them as an inherent adversary of the natural world though Bookchin uncovers a hidden history of cities as eco communities that fostered diversity and interconnection living in balance with and awareness of nature Just as ecosystems rely on participation and mutualism so must cities and their citizens rediscover these qualities establishing harmonious ethical social relations as a basis for a healthy ecological relationship to the natural world Published for the one hundredth anniversary of Murray Bookchin's birth Urbanization Without Cities is the first in a series of his books that AK Press is reprinting and bringing to a new audience

Feminism and Ecological Communities Christine Cuomo,2002-09-11 Feminism and Ecological Communities presents a bold and passionate rethinking of the ecofeminist movement It is one of the first books to acknowledge the importance of postmodern feminist arguments against ecofeminism whilst persuasively presenting a strong new case for ecological feminism Chris J Cuomo first traces the emergence of ecofeminism from the ecological and feminist movements before clearly discussing the weaknesses of some ecofeminist positions Exploring the dualisms of nature culture and masculin feminine that are the bulwark of many contemporary ecofeminist positions and questioning traditional feminist analyses of gender and caring Feminism and Ecological Communities asks whether women are essentially closer to nature than men and how we ought to link the oppression of women people of colour and other subjugated groups to the degradation of nature Chris J Cuomo addresses these key issues by drawing on recent work in feminist ethics as well as the work of diverse figures such as Aristotle John Dewey Donna Haraway and Maria Lugones A fascinating feature of the book is the use of the metaphor of the cyborg to highlight the fluidity of the nature culture distinction and how this can enrich ecofeminist ethics and politics An outstanding new argument for an ecological feminism that links both theory and practice Feminism and Ecological Communities bravely redraws the ecofeminist map It will be essential reading for all those interested in gender studies environmental studies and philosophy

Freedom and Environment Michael

Hannis,2015-10-05 Must freedom be sacrificed to achieve ecological sustainability or vice versa Can we be genuinely free and live in sustainable societies This book argues that we can if we recognise and celebrate our ecological embeddedness rather than seeking to transcend it But this does not mean freedom can simply be redefined to fit within ecological limits Addressing current unsustainability will involve significant restrictions and hence will require political justification not just scientific evidence Drawing on material from perfectionist liberalism capabilities approaches human rights relational ethics and virtue theory Michael Hannis explores the relationship between freedom and sustainability considering how each contributes to human flourishing He argues that a substantive and ecologically literate conception of human flourishing can underpin both capability based environmental rights and a eudaimonist ecological virtue ethics With such a foundation in place public authorities can act both to facilitate ecological virtue and to remove structural incentives to ecological vice Freedom and Environment is a lucid addition to existing literature in environmental politics and virtue ethics and will be an excellent resource to those studying debates about freedom with debates about ecological sustainability Climate Change, Vulnerability and Migration S. Irudaya Rajan,R. B. Bhagat,2017-09-22 This book highlights how climate change has affected migration in the Indian subcontinent Drawing on field research it argues that extreme weather events such as floods droughts cyclones cloudbursts as well as sea level rise desertification and declining crop productivity have shown higher frequency in recent times and have depleted bio physical diversity and the capacity of the ecosystem to provide food and livelihood security The volume shows how the socio economically poor are worst affected in these circumstances and resort to migration to survive The essays in the volume study the role of remittances sent by migrants to their families in environmentally fragile zones in providing an important cushion and adaptation capabilities to cope with extreme weather events The book looks at the socio economic and political drivers of migration different forms of mobility mortality and morbidity levels in the affected population and discusses mitigation and adaption strategies The volume will be of great interest to scholars and researchers of environment and ecology migration and diaspora studies development studies sociology and social anthropology governance and public policy and politics **Nature's Web** Peter Marshall,2015-02-12 This powerful book provides the first comprehensive overview of the intellectual roots of the worldwide environmental movement from ancient religions and philosophies to modern science and ethics and synthesizes them into a new philosophy of nature in which to ground our moral values and social action It traces the origins and evolution of the dominant worldview that has built our industrial technocratic man centered civilization and brought us to the current ecological crisis At the same time it uncovers an alternative cultural tradition in the world s different religions and philosophies and describes how these ideas are now surfacing and coalescing to form an ecological sensibility and a new vision of nature which recognizes the inter relatedness of all living things Finally this book integrates these varied traditions with modern physics and the science of ecology into a larger philosophical whole that provides the environmental movement with a comprehensive vision of an

organic and sustainable society in harmony with nature As ecological disasters continue to threaten our planet becoming worse with every passing moment of indifference it has become clear that we must take action We must change our relationship with nature and return to the days when our lives were intimately connected to and dependent upon the natural world Nature s Web lays the foundations for that change by explaining where our complex ideas about nature come from why they are wrong and what we can do to change them

Anarchism and Authority Mr Paul McLaughlin, 2012-10-01 Examining the political theory of anarchism from a philosophical and historical perspective Paul McLaughlin relates anarchism to the fundamental ethical and political problem of authority The book pays particular attention to the authority of the state and the anarchist rejection of all traditional claims made for the legitimacy of state authority the author both explaining and defending the central tenets of the anarchist critique of the state The founding works of anarchist thought by Godwin Proudhon and Stirner are explored and anarchism is examined in its historical context including the influence of such events as the Enlightenment and the French Revolution on anarchist thought Finally the major theoretical developments of anarchism from the late nineteenth century to the present are summarized and evaluated This book is both a highly readable account of the development of anarchist thinking and a lucid and well reasoned defence of the anarchist philosophy
