of different actors in the international system including the European Community and multinational corporations **Toward A Just World Order** Richard Falk, 2019-03-22 This text is designed to provide students with a solid theoretical and methodological base for understanding how the present international system works how that system is likely to evolve given current world trends and what realistically can be done to alleviate the most serious global problems Part 1 develops a world order perspective by examining **Community Participation and Sustainable Forest Development** Ajoy Kumar Bhattacharya, 2001 *Palgrave Advances in International Environmental Politics* M. Betsill, K. Hochstetler, D. Stevis, 2005-10-31 *Palgrave Advances in International Environmental Politics* provides a state of the art review of the major theoretical approaches and substantive debates of the field The first section reviews the historical development of international environmental politics as well as the theoretical and methodological approaches used in its study The following chapters each review the trajectory of a key research area within international environmental politics and elaborate on current approaches and debates Case studies in each chapter illuminate the main theoretical questions that emerge from the review **Unesco and Social Sciences** S. P. Agrawal, J. C. Aggarwal, 1988 [The Right Kind of Revolution](#) Michael E. Latham, 2011-01-15 After World War II a powerful conviction took hold among American intellectuals and policymakers that the United States could profoundly accelerate and ultimately direct the development of the decolonizing world serving as a modernizing force around the globe By accelerating economic growth promoting agricultural expansion and encouraging the rise of enlightened elites they hoped to link development with security preventing revolutions and rapidly creating liberal capitalist states In [The Right Kind of Revolution](#) Michael E Latham explores the role of modernization and development in U S foreign policy from the early Cold War through the present The modernization project rarely went as its architects anticipated Nationalist leaders in postcolonial states such as India Ghana and Egypt pursued their own independent visions of development Attempts to promote technological solutions to development problems also created unintended consequences by increasing inequality damaging the environment and supporting coercive social policies In countries such as Guatemala South Vietnam and Iran U S officials and policymakers turned to modernization as a means of counterinsurgency and control ultimately shoring up dictatorial regimes and exacerbating the very revolutionary dangers they wished to resolve Those failures contributed to a growing challenge to modernization theory in the late 1960s and 1970s Since the end of the Cold War the faith in modernization as a panacea has reemerged The idea of a global New Deal however has been replaced by a neoliberal emphasis on the power of markets to shape developing nations in benevolent ways U S policymakers have continued to insist that history has a clear universal direction but events in Iraq and Afghanistan give the lie to modernization's false hopes and appealing promises *The Challenge of Tourism Carrying Capacity Assessment* Harry Coccossis, Alexandra Mexa, 2017-03-02 Planning and management for tourism growth is becoming essential in the context of sustainable development Particularly so since many tourist destinations are facing severe pressures from tourist flows and

activities Such pressures are evidenced in terms of dysfunctions congestion environmental degradation etc which ultimately affect the attraction and competitiveness of tourism destinations The development of tourism should be considered in accordance with sustainability principles In this context respecting the capacity of the local system to sustain growth becomes a key challenge This book examines the use of various tools to define measure and evaluate tourism carrying capacity TCC a tool aiming to impose limits for entering certain tourist destinations or using certain activities Drawing on case studies from France Spain Italy Greece the UK the Netherlands Ireland Belgium Austria Germany and Finland it presents practical experiences of implementing TCC in various tourist destinations i e historic towns coastal zones islands etc It draws conclusions regarding the measurement and implementation of TCC assessment and provides further guidelines towards a comprehensive methodological framework for assessing tourism sustainability in the future
