GEOPOLITICS

THE STRUGGLE FOR SPACE AND POWER

What is the global scheme of political strategy upon which the German high command has based the fate of the world? Why did Germany attack Russia? Why has Russia not joined the war effort against Japan? The answer to these and many other crucial questions lies in *Geopolitics*—the conception of Karl Haushofer.

Geopolitics The Struggle For Space And Power:

Geopolitics Robert Strausz-Hupé, 1942 *Geopolitics. The Struggle for Space and Power. (Fifth Impression.).* Robert Strausz HUPÉ, 1945 **Western Geopolitical Thought in the Twentieth Century (Routledge Library Editions: Political Geography)** Geoffrey Parker, 2014-10-03 This book surveys the development of geo political thought in the twentieth century and relates it to international political developments as well as examining how sound geopolitical theories are. It considers the work of Mackinder, Hartshorne and Haushofer and his disciples in Germany who influenced the Nazis and of more recent developments including Marxist geographical writing **Contemporary China**, 1941 **Reframing the Buffer State in Contemporary International Relations** Bibek Chand, 2023-05-17 This book explores buffer states, agency beyond being highly interactive spaces for the competing strategic and security interests of larger powers. Analyzing 21 political events, the author offers a new conceptual framework for the buffer state which emphasizes strategic utility and agency. Applying this to the case study of Nepal as a buffer state between India and China, he offers a systematic analysis of Sino-Indian interests in the wider region and Nepal's interactions with and reactions to them and argues that the buffer state in contemporary international relations is characterized by intense competitive overtures from its contending neighboring states. However, the buffer state is not just a spectator but an active participant that consistently assesses and reassesses its geopolitical position in between much larger competing powers. This reading offers a new understanding of the buffer state as a highly dynamic political space wherein the levels of influence and strategies of bigger powers can be examined. Aimed at a multidisciplinary audience, this book will be of particular interest to scholars, practitioners and students of international relations, security studies, strategic studies and Asian Studies *Global Geostrategy* Brian Blouet, 2020-09-23 This is a new examination of Halford Mackinder's seminal global geostrategic work from the perspective of geography, diplomatic history, political science, international relations, imperial history and the space age. Mackinder was a man ahead of his time. He foresaw many of the key strategic issues that came to dominate the twentieth century. Until the disintegration of the Soviet Union, western defence strategists feared that one power or alliance might come to dominate Eurasia. Admiral Mahan discussed this issue in *The Problem of Asia* 1900 but Mackinder made the most authoritative statement in *The Geographical Pivot of History* 1904. He argued that in the closed Heart Land of Euroasia was a strategically placed region with great resources that if controlled by one force could be the basis of a World Empire. James Kurth in *Foreign Affairs* has commented that it has taken two World Wars and the Cold War to prevent Mackinder's prophecy becoming reality. In World War I and World War II, Germany achieved huge territorial gains at the expense of the Russian empire and the Soviet Union. In the former conflict, the Russian empire was defeated by Germany but the western powers insisted that the territorial gains made by Germany at the treaty of Brest-Litovsk be given up. In World War II, Britain and the US gave material support to Stalin's totalitarian regime to prevent Nazi Germany gaining control of the territory and resources that might have been a basis for

world domination The west highly conscious of Mackinder s dictum 1919 that Who rules East Europe commands the Heartland quickly adopted policies to contain the Soviet Union History has therefore proved Mackinder s work to be of vital importance to generations of strategic thinking and he remains a key influence in the new millennium This book will be of great interest to all students and scholars of strategic studies and military history and of geopolitics in particular *War by Other Means* Robert D. Blackwill, Jennifer M. Harris, 2016-04-12 Nations carry out geopolitical combat through economic means Yet America often reaches for the gun over the purse to advance its interests abroad Robert Blackwill and Jennifer Harris show that if U S policies are left uncorrected the price in blood and treasure will only grow Geoeconomic warfare requires a new vision of U S statecraft **The Madison Quarterly**, 1943 **The Political Economy of Total War** Georgetown University. School of Foreign Service, 1942 *BISS Journal*, 1980 **Military Aspects of World Political Geography** United States. Air Force ROTC., 1954 **University of California Publications in International Relations** University of California (1868-1952), 1966 **Fighting for America** Jeremy Black, 2011-09-06 Fascinating a 300 plus year history of North America from the award winning historian and author of *The Holocaust History Memory* Military Heritage Prize winning author Jeremy Black traces the competition for control of North America from the landing of Spanish troops under Hern n Cort s in modern Mexico in 1519 to 1871 when with the Treaty of Washington and the withdrawal of most British garrisons Britain accepted American mastery in North America In this wide ranging narrative Black makes clear that the process by which America gained supremacy was far from inevitable The story Black tells is one of conflict diplomacy geopolitics and politics The eventual result was the creation of a United States of America that stretched from Atlantic to Pacific and dominated North America The gradual withdrawal of France and Spain the British accommodation to the expanding U S reality the impact of the American Civil War and the subjugation of Native peoples are all carefully drawn out Black emphasizes contingency not Manifest Destiny and reconceptualizes American exceptionalism to take note of the pressures and impact of international competition A refreshing take on Manifest Destiny American and Canadian readers will learn a lot of new things and be led into new ways of viewing old ones An important contribution Walter Nugent author of *Into the West The Story of Its People* **Bulletin of the Commission to Study the Organization of Peace** Commission to Study the Organization of Peace, 1941 **The American Experience in World War II: Pearl Harbor in history and memory** Walter L.
