Guggenheim Museum, 1995 By the time Georg Baselitz b 1938 came to artistic maturity in Germany in the mid 1960s he had renounced the gestural abstraction prevalent in Europe and America and developed a new aesthetic based upon the figure and its representation as an abstract image His bold canvases which began to feature his signature upside down figures later in the decade have brought him international recognition but only now is his important career the subject of a comprehensive survey organized by the Guggenheim Museum and traveling to the Los Angeles County Museum of Art the Hirshhorn Museum and Sculpture Garden Washington D C and the Nationalgalerie Berlin This monograph by Guggenheim Deputy Director and Senior Curator Diane Waldman documents every phase of the artist's career as a painter and sculptor New translations of many of Baselitz's writings provide additional insight into his radical use of the figure in painting A chronology bibliography and exhibition history are also included **Art Books** Wolfgang M. Freitag, 2013-10-28 First published in 1997 For this second edition of Art Books A Basic Bibliography of Monographs on Artists the vast number of new books published since 1985 was surveyed and evaluated This has resulted in the selection of 3 395 additional titles These selections reflective of the increase in the monographic literature on artists during the last ten years are evidence of the activities of a larger number of art historians in more countries worldwide of the increasingly diverse and ambitious exhibition programs of museums whose number has also increased dramatically and also of a lively international art market and the attendant gallery activities The selections of the first edition have been reviewed errors have been corrected and important new editions and reprints have been noted The second edition contains 278 names of artists not represented in the first edition **The Renaissance of Etching** Catherine Jenkins, Nadine M. Orenstein, Freyda Spira, Peter Fuhling, Donald J. La Rocca, Anne Varick Lauder, Christof Metzger, Femke Speelberg, Ad Stijnman, Pierre Terjanian, Julia Zaunbauer, 2019-10-21 The Renaissance of Etching is a groundbreaking study of the origins of the etched print Initially used as a method for decorating armor etching was reimagined as a printmaking technique at the end of the fifteenth century in Germany and spread rapidly across Europe Unlike engraving and woodcut which required great skill and years of training the comparative ease of etching allowed a wide variety of artists to exploit the expanding market for prints The early pioneers of the medium include some of the greatest artists of the Renaissance such as Albrecht Dürer Parmigianino and Pieter Bruegel the Elder who paved the way for future printmakers like Rembrandt Goya and many others in their wake Remarkably contemporary artists still use etching in much the same way as their predecessors did five hundred years ago Richly illustrated and including a wealth of new information The Renaissance of Etching explores how artists in Germany the Netherlands Italy and France developed the new medium of etching and how it became one of the most versatile and enduring forms of printmaking p p1 margin 0 0px 0
