Geriatric Psychiatry Boston Society for Gerontologic Psychiatry,1965 **Geriatric Psychiatry** Martin Arthur Berezin,1979 **Female Psychology** Eleanor Schuker,Nadine A. Levinson,2020-09-23 This book provides a psychoanalytic perspective on female psychology and includes articles with divergent theoretical viewpoints It is useful for both research and clinical study and may also provide a bridge to scholars teachers and clinicians outside of psychoanalysis itself

Annual Review of Gerontology and Geriatrics, Volume 1, 1980 ,1980-01-15 The second volume in this long running series presents the usual critical and intensive review chapters divided into five sections but also addresses particular topics of special interest including drugs and their use and misuse among the aged the nonmedication orientation to treatment of various disorders the immune system and clinical procedures in the management of urinary incontinence As with all the volumes the contributors represent an international array of leading experts *Mental Health and the Elderly* Francis J. Turner,2010-06-15 The demographic shift to a much older population is having a large impact on social work professionals who have traditionally been the primary caretakers of the elderly As more people are living into advanced old age it is becoming increasingly important to understand and treat the wide range of psychological disorders which may affect them rather than simply attributing the disorders to senescence as was frequently done in the past *Mental Health and the Elderly A Social Work Perspective* is a comprehensive guide to diagnosis and treatment of the range of disorders affecting the elderly

Clinical Gerontology T.L. Brink,2014-04-04 Here is a major text in psychogeriatrics for all professionals in the field of aging and mental health Leading authorities provide valuable insights into assessment and intervention techniques for use with the mentally impaired elderly Topics include a depression scale for use in later life family therapy therapy in later life and various issues concerning mental health care for the aged *Geriatric Psychiatry. Grief, Loss, and Emotional Disorders in the Aging Process. The Boston Society for Gerontologic Psychiatry* Boston Society for Gerontologic Psychiatry,1965

Myers,1984 To find more information about Rowman and Littlefield titles please visit www.rowmanlittlefield.com *The Psychotherapy Of The Elderly Self* Hyman L. Muslin,2013-05-24 People grow old We are terrified by the fact And this fear has translated into a pervasive neglect of the elderly across all spheres of living Now Dr Hyman Muslin steps forward to challenge the mental health field to reevaluate its perspective on this powerful human resource The book is written in the effort to dispel some of the myths of aging to highlight old age as a natural developmental phase and to delineate an effective model of observation diagnosis and therapy for working with the elderly Ultimately Dr Muslin s message is one of hope for older individuals currently in need of psychological help and for the elderly self who awaits us all Advances in Psychodynamic Psychiatry César A. Alfonso,Richard C. Friedman,Jennifer I. Downey,2018-11-30 Bringing together important articles from Psychodynamic Psychiatry this volume shows how contemporary practitioners are using a multidimensional biopsychosocial approach to increase the robustness of clinical

research and the effectiveness of patient care Chapters review cutting edge approaches to formulating anxiety and mood disorders eating disorders traumatic grief substance use and addictive behaviors obsessive compulsive disorder personality disorders schizophrenia somatic symptom disorders and trauma and stressor related disorders Treatment of specific populations is addressed including infants and parents children spouses of the chronically ill survivors of intimate partner violence criminal offenders and the elderly Featuring rich case illustrations the book integrates psychoanalytic concepts with advances in knowledge about neuroscience gene environment interactions and the physiological impact of adversity

Working with Older People: Clinical aspects of aging, 1971 **The Clinical Psychology of Aging** Martha

Storandt, Ilene C. Siegler, Merrill F. Elias, 2012-12-06 It has been estimated that there are at least 2 500 000 adults 10% of the population above age 65 who are currently in need of some sort of mental health services Kramer Taube and Redick 1973 Other estimates are even higher e g Pfeiffer 1977 It is expected that this number will increase as the number of older adults increases over the next 40 years Probably less than 400 clinical psychologists are now providing services to this age group The number of elderly patients actually seen by these psychologists is very very small One national survey found that of 353 psychologists who reported that they had older clients only 495 individuals were seen for psychological testing and 1423 for psychotherapy in the one month just prior to the response Dye in press Assuming that the same individuals were not seen for both testing and therapy within the one month period a questionable assumption approximately 08% of the at least two and one half million older adults in need of psychological services are now being supplied with these services in some form or another Thus the need for increased involvement of clinical psychology with the aged is undeniable However few resources currently exist which will serve to increase the number of clinical psychologists trained to meet this need Probably less than 100 clinical psychologists living today have received any kind of formal graduate training in the clinical psychology of the aging Storandt 1977 **Personality Disorders in Older Adults** Erlene Rosowsky, Robert C. Abrams, Richard A.

Zweig, 2013-03-07 As the average age of the population rises mental health professionals have become increasingly aware of the critical importance of personality in mediating successful adaptation in later life Personality disorders were once thought to age out and accordingly to have an inconsequential impact on the lives of the elderly But recent clinical experience and studies underscore not only the prevalence of personality disorders in older people but the pivotal roles they play in the onset course and treatment outcomes of other emotional and cognitive problems and physical problems as well Clearly mental health professionals must further develop research methods assessment techniques and intervention strategies targeting these disorders and they must more effectively integrate what is being learned from advances in research and theory into clinical practice Inspired by these needs the editors have brought together a distinguished group of behavioral scientists and clinicians dedicated to understanding the interaction of personality and aging Offering a rich array of theoretical perspectives intrapsychic interpersonal neuropsychological and systems they summarize the empirical literature present

phenomenological case reports and review psychodynamic cognitive behavioral and pharmacological treatment approaches This comprehensive state of the art guide will be welcomed by all those who must confront the complexity and the challenge of working with this population **Readings in Psychotherapy with Older People** Steven Steury, Marie L. Blank, 1977

A Comprehensive Bibliography of the Thanatology Literature Martin L. Kutscher, 1975 **Leaders and Their Followers in a Dangerous World** Jerrold M. Post, 2004 Post is a pioneer in the field of political personality profiling He may be the only psychiatrist who has specialized in the self esteem problems of both Osama bin Laden and Saddam Hussein The New Yorker Policy specialists and academic scholars have long agreed that for U S leaders to deal effectively with other actors in the international arena they need images of their adversaries Leaders must try to see events and indeed their own behavior from the perspective of opponents Faulty images are a source of misperceptions and miscalculations that have often led to major errors in policy avoidable catastrophes and missed opportunities History supplies all too many examples from the Foreword What impels leaders to lead and followers to follow How did Osama bin Laden the son of a multibillionaire construction magnate in Saudi Arabia become the world s number one terrorist What are the psychological foundations of man s inhumanity to man ethnic cleansing and genocide Jerrold M Post contends that such questions can be answered only through an understanding of the psychological foundations of leader personality and political behavior Post was founding director of the Center for the Analysis of Personality and Political Behavior for the CIA He developed the political personality profiles of Menachem Begin and Anwar Sadat for President Jimmy Carter s use at the Camp David talks and initiated the U S government s research program on the psychology of political terrorism He was awarded the Intelligence Medal of Merit in 1979 for his leadership of the center In this book he draws on psychological and personality theories as well as interviews with individual terrorists and those who have interacted with particular leaders to discuss a range of issues the effects of illness and age on a leader s political behavior narcissism and the relationship between followers and a charismatic leader the impact of crisis induced stress on policymakers the mind of the terrorist with a consideration of killing in the name of God and the need for enemies and the rise of ethnic conflict and terrorism in the post Cold War environment The leaders he discusses include Fidel Castro Osama bin Laden Saddam Hussein Kim Jong Il and Slobodan Milosevic *Selected Papers of Salman Akhtar* Salman Akhtar, 2023-06-01 Salman Akhtar is a Professor of Psychiatry a Training and Supervising Analyst a member of numerous editorial boards winner of many awards including the highly prestigious Sigourney Award a writer of several hundred articles a poet and the author or editor of over one hundred books A modern day Renaissance man his elegant writing is simultaneously scholarly and literary and brings a light touch to profound material Phoenix Publishing House is proud to present his most inspiring works in a stunning ten volume hardback set fit to grace the shelves of collectors and libraries with its high quality finish Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1968 The Race Against Time Robert A. Nemiroff, Calvin A. Colarusso, 2013-11-21 This is the second book

in the pioneering investigation of adult development by Robert A Nemiroff and Calvin A Colarusso The first Adult Development A New Dimension in Psychodynamic Theory and Practice arrived to critical acclaim in 1981 It presented a psychodynamic theory of development during the second half of life and a model of normal adult functioning This book is the logical sequel expanding and elaborating the original formulations and applying them to the clinical practice of psychotherapy and psychoanalysis Nemiroff and Colarusso demonstrate that these are appropriate techniques for patients in the second half of life regardless of age They lay to rest many stereotypes and myths that have long interfered with the dynamic treatment of older patients and they propose exciting new conceptualizations such as that of adult developmental arrests The genetic approach reaches beyond childhood and adolescence and takes on important new meaning by incorporating an adult developmental past that influences both psychopathology and transference The relationship between theory and therapy is richly demonstrated in the clinical presentations including ten detailed case histories of patients between the ages of 40 and 80 These and other clinical discussions provide ample evidence that a psychodynamic approach that is based on a sound adult developmental psychology can be extraordinarily effective They also demonstrate both the similarities and differences in working with older versus younger patients This work is a major contribution in a long neglected dimension of clinical psychiatry SHERWYN M

Stepparenting Stanley H. Cath, Moisy Shopper, 2013-04-15 In an era when teachers commonly report that up to half of the children in their classes come from multiple homes and have multiple caretakers the special psychological challenges of stepparenting have never been in greater need of examination As thoughtful clinicians have long known stepparenting is among the most complicated of psychological projects it may simultaneously be a multifaceted burden and a spur to personal autonomy deepened sensitivity to others and newfound competence as a nurturer Among the thousands of divorced people who remarry each year most despite their best resolve to live in the present persist in reassessing the price of separation especially as they come to appreciate the fact that divorce is seldom a total break for their children Stepparenting is a comprehensive exploration of the process of reconstructing families More specifically it is a book about the perils and promise of stepparenting a caretaking role that may be more challenging than biologically given child rearing Contributors follow people as they try to reevaluate past misunderstandings and acclimate to new parenting contexts and obligations Editors Cath and Shopper have taken pains to offer a balanced purview that includes both successful and maladaptive instances of stepparenting Of special note are the clinical examples throughout the book that chart the extended periods of slow creative learning experienced by parents and children biological and step as they test the waters of new family systems and try to elicit newly attuned responses from each other
