German Medical Data Sciences 2023 — Science. Close to People. Niels Grabe, Martin Haag, Ursula Hertha Hübner, Ulrich Sax, Carsten Oliver Schmidt, Martin Sedlmayr, 2023-10-15. The Covid 19 pandemic affected the daily lives of all of us on many levels. Epidemiology suddenly became a personal matter and general interest in many aspects of medical data science became much more widespread. And physical distance became the new normal. This book presents the full paper part of the proceedings of GMDS 2023, the 68th annual meeting of the German Association for Medical Informatics, Biometry and Epidemiology, held from 17 to 21 September 2023 in Heilbronn, Germany. The theme of the conference was Science Close to People, a particularly appropriate theme for the first of these annual conferences to be held face to face since 2019. A total of 227 scientific contributions were submitted to GMDS 2023, including 41 full papers for this volume in Studies in HTI. Of these, 30 papers are included here following a rigorous two-stage review process which represents an acceptance rate of 73%. The 30 papers in this book are grouped under 8 headings: FAIRification, research software engineering for research infrastructure, human factors, data quality, clinical decision support, evaluation of healthcare IT, biosignals and interoperability. Refugees and Migrants in Law and Policy Helmut Kury, Sławomir Redo, 2018-05-31. Refugees and migration are not a new story in the history of humankind, but in the last few years, against a backdrop of huge numbers of migrants, especially from war-torn countries, they have again been a topic of intensive and contentious discussion in politics, the media, and scientific publications. Two United Nations framework declarations on the sustainable development goals and on refugees and migrants adopted in 2016 have prompted the editors, who have a background in international criminology, to invite 60 contributors from different countries to contribute their expertise on civic education aspects of the refugee and migrant crisis in the Global North and South. Comprising 35 articles, this book presents an overview of the interdisciplinary issues involved in irregular migration around the world. It is intended for educationists, educators, diplomats, those working in mass media, decision makers, criminologists, and other specialists faced with questions involving refugees and migrants, as well as those interested in improving the prospects of orderly, safe, regular, and responsible migration in the context of promoting peaceful and inclusive societies for sustainable development. Rather than a timeline for migration policies based on now, with states focusing on stopping migration, now sending back migrants, now or bringing in technicians or low-skilled migrant workers, now, there should be a long-term strategy for multicultural integration and economic assimilation. This book, prefaced by François Crépeau, the United Nations Special Rapporteur on the human rights of migrants, and William Lacy Swing, Director General of the International Organization for Migration, addresses the question of the rights and responsibilities involved in migration from the academic

and practical perspectives of experts in the field of social sciences and welfare and charts the way forward to 2030 and beyond and also beyond the paradigm of political correctness Germany's Civilian Power Diplomacy C. Arora,2006-08-07
