unpaid work that goes on within European households in sustaining the well being of the continent's populations. However, care work and domestic labour continue to be largely unremunerated and unequally distributed by gender. This unique volume of interdisciplinary essays casts new light on the roles that households play in securing the well being of individuals and families, uncovering the processes of bargaining and accommodation and conflict and compromise that underpin them. Contributors put gender at the centre of their analyses, demonstrating the uneven experiences of men and women as both providers and receivers of welfare in European households in both the past and the present. As European states grapple with changing family forms, a growing population of dependent people, increased participation of women in labour markets and a profound shift in the nature and organisation of work, this book makes a timely contribution to our understanding of the critical role played by households in mediating processes of economic and social change. It offers new challenges to scholars, researchers and policy makers eager to address gender inequalities and enhance well being. This book is the second of four volumes being published as part of Ashgate's Gender and Well Being series that arise from a programme of international symposia funded by the European Science Foundation under the auspices of COST European Cooperation in the field of Scientific and Technical Research.

How to Read Economic News Henry Silke, Fergal Quinn, Maria Rieder, 2023-08-31 Closely examining how the news media reports economic and financial matters, this book equips students with solid methodological skills for reading and interpreting the news alongside a toolkit for best practice as an economic journalist. *How to Read Economic News* combines theory and practice to explore the discourse surrounding economics in the mass media and how this specialised form of reporting can be improved. Beginning by introducing major concepts such as financialised economic reporting, media amnesia and loss of trust, the book goes on to help students to interpret, understand and analyse existing news discourse and to identify subtle biases in news reports stemming from hegemonic belief systems. The final section puts this analytical knowledge into practice, providing students with methods for the critical production of news and covering such skills as identifying newsworthiness, story sourcing, achieving clarity and using complex datasets in news stories. This is a key text for students and academics in the fields of financial journalism and critical discourse analysis who wish to approach the subject with a critical eye.
