Photographs Robert Bruce, 1998 Following his highly praised book on *German Automatic Weapons of World War II* and *Machine Guns of World War I* this respected US author turns to the weapons carried by the GI of the infantry rifle platoon in World War II and Korea **German Automatic Rifles 1941-45** Chris McNab, 2013-03-20 This book explores the origins development combat use and lasting influence of Nazi Germany's automatic rifles focusing on the Gew 41 W Gew 43 Kar 43 FG 42 and MP 43 StG 44 The Blitzkrieg campaigns of 1939-40 convinced many observers that most infantry combat took place at closer ranges than the 750-1000m From 1941 Germany's arms designers took note and produced a new series of infantry firearms This study not only provides a detailed technical description of each weapon but also explores how the firearms performed on the battlefields of World War II The combat takes us from the FG 42 in the hands of Fallschirmjäger at Monte Cassino through to StG 44s being used by Waffen SS soldiers on both the Eastern and Western Fronts Postwar service

is also studied such as the Gew 43's adoption by the Czech Army and the StG 44's use by the Viet Cong in the Vietnam War. Setting each firearm in its tactical and historical context and employing striking photographs and full colour artwork, firearms expert Chris McNab sets out the absorbing story of this distinctive and influential series of weapons. *The Savage Storm* James Holland, 2023-12-12

Acclaimed WWII historian James Holland both narrates and reframes the controversial first months of the Italian Campaign and sets a new standard in the chronicling of war. Following victory in Sicily while the central command planned the spring 1944 invasion of France, Allied troops crossed into southern Italy in September 1943, expecting to drive Axis forces north and liberate Rome by Christmas. Italy quickly surrendered but German divisions fiercely resisted and the hoped-for quick victory descended into one of the most challenging and protracted battles of the entire war. James Holland's *The Savage Storm* chronicling the dramatic opening months of the Italian Campaign in unflinching and insightful detail is unlike any campaign history yet written. Holland has always narrated war at ground level but here goes further by chronicling events almost entirely through the contemporary eyes of those who were there on all sides and at all levels. Allied Axis civilians alike. Weaving together a wealth of letters, diaries and other documents from the likes of American General Mark Clark, German battalion commander Georg Zellner, New Zealand lance corporal Roger Smith, legendary war reporter Ernie Pyle and Italian politician Filippo Caracciolo, Holland traces the battles as they were experienced across plains, over mountains, through shattered villages and cities in intense heat and towards the end of December 1943, frigid cold and relentless rain. Such close-up views persuade Holland to recast important aspects of the campaign, reappraising the reputation of Mark Clark himself and other senior commanders of the US Fifth and British Eighth Armies. Given the shortage of Allied shipping and materiel allocated to Italy because of the build-up for D-Day, more was expected of Allied troops in Italy than anywhere else and as accounts at the time attest, a huge price was paid by everyone for each bloodily contested mile. Putting readers vividly in the moment as events unfolded with characters made unforgettable by their own words, *The Savage Storm* is a defining account of the pivotal months leading to Monte Cassino and a landmark in the writing about war. *Bolt Action: World War II Wargames Rules* Warlord Games, Alessio Cavatore, Rick Priestley, 2012-09-20

Sniping Rifles on the Eastern Front 1939-45 Martin Pegler, 2019-03-21 The Soviet Union had developed a significant sniping force by 1939 but the extraordinary skill and cunning displayed by Finnish snipers during the Winter War forced the Soviets to innovate On the other side German sniping suffered from a lack of

standardization of weapons and a lack of marksmen deployed at the start of the Great Patriotic War 1941-45. There were few heroes in the conflict but on both sides the snipers were idolized especially on the Soviet side gaining almost mythical status. As well as traditional bolt action weapons both sides used several types of semi automatic rifle such as the SVT 38 and the Gew 41. Offering greater firepower at the expense of long range accuracy such weapons would be profoundly influential in the postwar world. Fully illustrated this absorbing study investigates the development of sniping weapons and techniques on World War II's Eastern Front. *MP 38 and MP 40 Submachine Guns* Alejandro de Quesada, 2014-07-20. Nazi Germany's MP 38 and MP 40 submachine guns are among World War II's most recognizable weapons. Portable and with folding stocks both were widely issued to airborne troops and became the hallmark of Germany's infantry section and platoon leaders. A million were produced during the conflict and many found their ways into the hands of paramilitary and irregular forces from Israel to Vietnam after the war. Featuring specially commissioned full color artwork and period and close up photographs this is the story of the origins, combat use and lasting influence of two of World War II's most famous firearms. **Encyclopedia of Military Technology and Innovation** Stephen Bull, 2004-06-30. The research summarized within the covers of these volumes has been compiled by the Bureau of Ordnance, Department of the Navy in order to place in the hands of those rightfully interested in the art of automatic weapon design the world's recorded progress in this field of endeavor. the most important military struggle of the 20th Century **Cassino '44** James Holland, 2024-11-12 Acclaimed World War II historian James Holland vividly relates the dramatic last months of the Italian Campaign in a masterful volume that brings new awareness to this vital hinge point of the war As the new year of 1944 began in Italy the Allied army's momentum had ground to a halt just south of the vaunted German Gustav Line of defense far short of their initial objective of liberating Rome by Christmas The fighting up the Italian peninsula had been brutal rugged terrain fierce resistance terrible weather While Allied leaders in London prepared for the cross Channel invasion of France later that spring the war in the West hinged in Italy As bestselling historian James Holland relates in his seminal concluding volume on the Italy Campaign the next five months saw two of World War II's most famous battles the four ferocious assaults on Monte Cassino and the fraught landing northwest in the marshes at Anzio culminating at last in the liberation of Rome on June 4 merely two days before D Day Based on twenty years of research **Cassino 44** offers perspectives and conclusions that differ from the standard narrative Holland elevates the narrative of war chronicling the dramatic events primarily through in the moment letters and diaries of those who were there Counterpointing the memories of German soldiers like battalion commander Jurg Kellner with those of British captain John Strick and American corporal Audie Murphy whose exploits in the field would lead to Hollywood fame and of Italian citizens and politicians caught up in the maelstrom Holland vividly recreates their day to day encounter with destiny over each bloodily contested mile General Mark Clark overall Allied commander in Italy has been criticized for being overly cautious and needlessly extending the campaign Holland argues that given the conditions and constant shortage of materiel held back for the D Day invasion Clark and other commanders led a remarkably successful campaign Well more than 100 000 Allied casualties occurred in the five months leading to Rome more than in any other campaign of the war **Cassino 44** is the definitive account of a key turning point of World War II and brings our appreciation of the experience of war to a new level **The Machine Gun, History, Evolution, and Development of Manual, Automatic, and Airborne Repeating Weapons** Ordnance Bureau (Navy Department), 1951
