**SdKfz 251 Half-Track 1939-45** Bruce Culver,2012-07-20 Following in the best traditions of German ingenuity in design and construction of armoured vehicles the SdKfz 251 firmly realised the concept of a competent cross country tactical vehicle for armoured infantry units So successful was this half track that not only did a modified version of it remain in use with Czech forces well into the 1980s but also ironically the armoured infantry tactics that the Germans pioneered with it were adopted by Allied forces in the Second World War and helped them to achieve the eventual defeat of Germany This book covers the genesis and development of the SdKfz 251 and details the numerous modifications and variations that sprang from combat experience

**German Halftracks at War, 1939-1945** Paul Thomas,2012-03-15 The author of the bestselling Panzer IV at War delivers a highly illustrated look at a key element in the German Blitzkrieg during the Second World War HistoryOfWar.org In the aftermath of the Great War which saw the introduction of the tank the more far sighted military leaders realized that the future of warfare hinged on a balance of mobility firepower and protection Tanks would need to be accompanied into battle by supporting arms specifically infantry artillery and engineers An all fully tracked field army was thought to be too expensive so the semi tracked support vehicle commonly called a halftrack was born The halftrack concept was embraced by France the US and most notably Germany The Germans commissioned numerous types of half tracked tractors which were classified by the weight of their towed load These vehicles were designated Sonderkraftfahrzeug special motorized vehicle abbreviated as Sd Kfz These front wheel steering vehicles with tracked drive transformed the fighting quality of the armored divisions They carried the infantry alongside the advancing panzers and brought guns and pontoon bridge sections The halftrack also became the preferred reconnaissance vehicle This latest addition to the highly successful and collectable Images of War series has a superb collection of rare images supported by detailed captions and text of the many Sd Kfz variants in diverse theatres of war It is worth reflecting that without half tracks there could have been no Blitzkrieg

**German Half-Tracks and Wheeled Vehicles** Alexander Ludeke,2015 Every vehicle is presented with a short description images and a reference table of key technical data supplemented by colour drawings with camouflage and identification numbers Back cover

German Self-Propelled Anti-Tank and Anti-Aircraft Guns, 1939-1945 Ian Baxter,2025-06-30 Self propelled anti tank and anti aircraft vehicles were a key element of the Nazi Army during the Second World War Anti tank weapons assumed great importance from the outbreak of war as combatants developed ever more effective armoured vehicles and tactics Some were little more than stopgap solutions such as mounting the weapons on a tracked vehicle to give enhanced mobility while others were more sophisticated designs Examples of the development of tank destroyer technology throughout the war are the Marders Jagdpanzer 38 and Nashorn In order to provide much needed fire power vehicles like the 5 ton Sd Kfz 6 halftrack mounted Soviet 76 2mm field guns The Marder series played a key role supporting armoured operations with their anti tank guns Anti aircraft firepower was vital to

give protection to troops from increasingly potent Allied ground attack The Germans also mounted anti aircraft guns onboard halftracks such as the Sd Kfz 10 5 and 10 4 armed with 2cm Flak guns the medium Sd Kfz 7 1 halftrack mounting 2cm flak guns including quadruple flak guns on certain modified vehicles Later in the war there was the Flakpanzer 38 t with a 2cm flak gun an Sd Kfz 6 2 Flak halftrack and the Flakpanzer IV Wirbelwind with a rotating flak gun turret armed with quadruple 2cm flak guns In true Images of War style the authoritative text is superbly supported by well captioned contemporary images
