German Light Field Artillery In World War II:

German Light Field Artillery in World War II Joachim Engelmann, 1995 German light artillery as used on all fronts and with a variety of sizes and capabilities **Encyclopedia of World War II** Alan Axelrod, 2007 A reference to the ideological military political biographical and social topics surrounding World War II which is often considered the pivotal event of the twentieth century **Artillery Warfare, 1939-1945** Simon Forty, Jonathan Forty, 2020-11-25 From mountain warfare with guns on mules to V2 rockets and everything between makes it well worth a place on anyone's reference shelf *Clash of Steel* It is said that artillery won the Second World War for the Allies that Soviet guns wore down German forces on the Eastern Front negating their superior tactics and fighting ability and that the accuracy and intensity of the British and American artillery was a major reason for the success of Allied forces in North Africa from El Alamein in Italy and Normandy and played a vital role in the battles of 1944 and 1945 Yet the range of weapons used is often overlooked or taken for granted which is why this highly illustrated history by Simon and Jonathan Forty is of such value They stress the importance of artillery on every front and analyze how artillery equipment training and tactical techniques developed during the conflict The selection of wartime photographs many from east European sources and the extensive quotations from contemporary documents give a graphic impression of how the guns were used on all sides The photographs emphasize the wide range of pieces employed as field antiaircraft and antitank artillery without forgetting self propelled guns coastal and other heavyweights and the development of rockets The authors offer a fascinating insight into the weapons that served in the artillery over seventy years ago Superbly illustrated this is testament to the courage and skills of extraordinary men in the execution of their duty An amazing book Books Monthly *King of Battle: Artillery in World War I*, 2016-01-12 In *King of Battle* Artillery in World War I a distinguished array of authors examines the centrepiece of battle in the Great War artillery Going beyond the usual tables of calibres and ranges the contributors consider the organization and technology of artillery as well as present aspects of training doctrine and other national idiosyncrasies Artillery dominated the battlefields of World War I and forever changed the military doctrine of war No nation that had participated in significant ground combat would blithely assume that morale could ever replace firepower The essays included in this volume explain how twelve countries including all the major combatants handled artillery and how it affected the Great War Contributors include Filippo Cappellano Boyd Dastrup Edward J Erickson Bruce Gudmundsson James Lyon Sanders Marble Janice E McKenney Dmitre Minchev Andrey Pavlov Kaushik Roy Cornel and Ioan Scafes John Schindler and David Zabecki Infantry and artillery weapons of the Hungarian army in WW2 Péter Mujzer, 2025-01-28 Hungary finished the WW1 on the losing side lost significant territory manpower and resources Due to the implementation of the Peace Treaty the existing arms industry and the Armed Forces were seriously limited From the beginning the arms industry and the Armed Forces secretly retained capacities which were over the limitations From the beginning of the 30s the enlargement and modernisation of the Armed

Forces started Hungary was an agricultural county with limited heavy industrial assets but it was a solid foundation to modernise and produce infantry weapons and artillery First it based on the modernisation of the WW1 weaponry inherited from the Austro Hungarian Army Later licences were purchased and put into production During WW2 the Hungarian industry was able to supply the Army with all kinds of small arms and artillery weapons however not all were modern designs A significant number of German and captured weaponry also purchased by the Hungarians

World War II Infantry Fire Support Tactics Gordon L. Rottman, 2016-10-20 As infantry units advanced across Europe the only support they could rely on from day to day was that provided by the heavy weapons of their own units While thundering tanks struck fear into the hearts of their enemies it was the machine guns mortars and light cannon that proved to be most important causing the majority of casualties suffered during World War II Common principles were shared across units but the wide variety of weapons available to the different armies altered the way they were used in battle Focusing on the US British German and Soviet troops this title offers a comprehensive guide to infantry fire support tactics used through World War II Combat reports are complemented by specially commissioned artwork to show the way in which tactics varied and highlight how developments obliged opposing armies to review their own methods

Skaarup, 2012-02 *Shell Drake* is an informative and detailed synopsis of the carefully preserved and restored guns and artillery on display in Canada. The Royal Regiment of Canadian Artillery is represented by a long and distinguished line of gunners with historical ties back to the days before Canada's Confederation. The honour of defending Canada while standing steady to support operations overseas in peace and war continues to this day. In doing so it is necessary to remember that the weapons of war are an integral part of what keeps this nation safe although the examples that have been used to make it so are few and far between. The descriptions of Canadian artillery and the places of honour where they can be viewed highlights the importance of the equipment that brought our nation forward at key turning points in history when our guns were in use as tools of war at home and overseas. This guide book will show the interested reader where to find examples of the historical guns preserved in Canada and perhaps serve as a window on how Canada's military contribution to security in the world has evolved.
