## **Geopolitics Of The World System:**

**Geopolitics of the World System** Saul Bernard Cohen, 2003 Cohen argues that the emergence of the United States as the world's sole superpower and the process of globalization have failed to remove the importance of geography as a political and strategic factor of great import. After laying out the structural basis for his theory of geopolitical theory, he launches into an examination of how geopolitical realities have developed since World War II, a period that witnessed greater change than the preceding two and a half centuries. He then turns his attention to the meat of the book: separate examinations of each of the major world regions, including examinations of the important countries and their individual geopolitical realities.

*Geopolitics and Geoculture* Immanuel Maurice Wallerstein, 1991-07-26 Written between 1982 and 1989, this collection contains the author's perspective on the events of this period. The book also charts the development of a challenge to the dominant geoculture, the cultural framework within which the world system operates. [Asia and the Transformation of the World-System](#) Ganesh K. Trichur, 2015-12-03 In this collaboratively authored book, world system scholars critically synthesize Asia's re-emerging centrality despite the myriad financial crises that have punctuated the end of the U.S.-dominated Cold War world order. From different vantage points, the authors review the turbulent landscape of the region that points toward a new Asian world order, as well as contradictory symptoms and signals. The text highlights the salience of Northeast Asia, the resurgence of Russia and Eurasianism, and the class, gender, and ecological implications of a conflict-ridden regional ascent for the future of the North-South divide and for the struggle between the spirit of Davos and the spirit of Porto Alegre.

[Questioning Geopolitics](#) Georgi M. Derluguian, Scott L. Greer, 2000-08-30 This volume takes an enlightened step back from the ongoing discussion of globalization. The authors reject the notion that globalization is an analytically useful term. Rather, this volume shows globalization as merely the framework of the current political debate on the future of world power. Some of the many other novel ideas advanced by the authors include the explicit prediction that East Asia is not going to become the center of the world, the contention that the USSR collapsed for the same reasons that nearly brought down the United States in 1973, and the notion that the regional economic networks that are emerging from under the modern states are in fact rather old formations. The articles in the volume are organized around three main themes. Part One explores both the changing patterns of global power from the viewpoint of geopolitics and the Gramscian approach to the study of international relations. Part Two further develops the debate among a number of eminent historians and sociologists, challenging both the apologists for and the opponents of globalization in new and unexpected ways. Part Three traces the emergence of regional economic networks and explores the ambiguous problems of security and identity posed by the old, new, transborder formations. *The Return of Geopolitics* Albert J. Bergesen, Christian Suter, 2018 With globalization fading and geopolitics on the rise, this volume analyzes globalization, geopolitical cycles, accompanied by rising and falling economic, military hegemonies, and the Chinese concept of Tianxia as an equivalent of the idea of hegemony, along with a theory of pre-

emptive hegemonic decline Geopolitical movements are also discussed including state seeking movements since the 16th century Kurdish struggles in Turkey African terrorist groups and the Russian intellectual movement called Eurasianism Finally there is a discussion of the geopolitics of the Anthropocene and the rise of Astropolitical theory *Geopolitics* Saul Bernard Cohen, 2009 Written by one of the world's leading political geographers this fully revised and updated textbook examines the dramatic changes wrought by ideological and economic forces unleashed by the end of the Cold War Saul Bernard Cohen considers these forces in the context of their human and physical settings and explores their geographical influence on foreign policy and international relations *From Geopolitics to Global Politics* Jacques Lévy, 2001 Addressing the weakening of the nation state and the globalizing tendencies of the 21st century this compilation of writings looks at international wars boundaries cultural conflict and world economy in a bid to address the changing relationship between politics and geography *Global Communications Since 1844* Peter J. Hugill, 1999-04-09 He traces the steps that led to the British surrender of world hegemony to the United States at the end of World War II

**The Struggle for Development and Democracy: A General Theory** Alessandro Olsaretti, 2023-03-13 In *The Struggle for Development and Democracy* Alessandro Olsaretti argues that we need significantly new theories of development and democracy to answer the problem posed by neoliberalism and the populist backlash namely uneven development and divisive politics heightened by the 9 11 attacks This volume proposes a general theory of development and democracy as part of a unified theory of power emphasizing that development needs markets civil society and the state and also the proper networks and interactions amongst markets civil society and the state Imperialism undermines these interactions and turns countries into providers of cheap land or labour This book begins to sketch the mechanisms at work and to answer one question how did imperialist elites build their power All royalties from sales of this volume will go to GiveWell org in honour of Alessandro Olsaretti's memory
