The Global Transformation of Time Vanessa Ogle, 2015-10-12 This book is a revisionist account of attempts to unify clock times calendars and social time and a methodological intervention in discussions about writing global and transnational history The book uses the reform of time between 1870 and 1950 as a lens through which to understand the dynamics of globalization Based on research in archives around the world in multiple languages individual chapters take the story of uniform time to France and Germany Britain the British Empire German colonies Latin America British India Arab elites in the Levant Muslim scholars in Egypt and to the League of Nations The author shows how cross border flows of ideas and concepts of uniform time resulted in a nationalization and regionalization of temporal identities As a consequence uniform accurate clock time remained nonstandardized unstable and incomplete as late as the 1930s and 1940s Calendar reform just as vivid and vast a field of activism as clock time never came to pass altogether due to strong national and religious objections to a uniform World Calendar When ideas about uniform time moved across borders and continents they often did so along lateral informal trajectories of transmission Local initiatives often preceded national time politics Top down attempts to devise time reform schemes at international conferences to implement them nationally and assure application in the most remote local contexts rarely succeeded Rather globalization disheveled such hierarchies of the international the national and the local The book then emphasizes the importance of nationalism and states as well as attention to scale in writing the history of global flows and connections
