This distinctive way of life was largely characterized by a closer connection to the earth local sufficiency informed by homesteading subsistence farming and gardening and the community wide trading of favors in a spirit of mutual aid Over time Salstrom s engagement in this neighborly occupation has nurtured an informed belief that Americans will be drawn back to landed customs taking care of the earth and of one another to thrive as individuals and communities Facing today s pandemics climate change and deepening political divisions says Salstrom Americans urgently need to create a groundswell of localized food security and energy production
