of globalization precarious work neoliberal politics attacks on unions and the idea of individual employment rights have challenged the protection of occupational health and safety for workers worldwide In Hazard or Hardship Jeffrey Hilgert presents the protection of refusal rights as a moral and a human rights question Hilgert finds that the protection of the right to refuse unsafe work as constituted under international labor standards is a failure and calls for a reexamination of worker health and safety policy from the ground up The current model of protection follows an individual employment rights framework which fails to protect workers against the inherent social inequalities within the employment relationship To adequately protect the right to refuse as a human right both in North America and around the world Hilgert argues that a broader protection must be granted under a freedom of association framework Hazard or Hardship will be a welcome resource for labor and environmental activists trade union leaders labor lawyers and labor law scholars industrial relations experts human rights advocates public health professionals and specialists in occupational safety and health
