

Lab Safety Rules

Science labs offer great opportunities for learning, teaching, and research. They also pose hazards that require proper safety precautions.

Stay safe when conducting your labs by following these guidelines.

Dress appropriately

Tie back long hair, and wear suitable gloves, goggles, and other protective equipment.

Proper supervision

Don't perform lab experiments without instructor supervision (unless given permission to do so)

Know location of emergency numbers & safety equipment

Know the location of safety equipment & emergency phone numbers. So you can access them quickly if necessary.

No Food

Don't eat or drink in lab and never taste chemicals

ID Hazards

Identify hazardous materials before beginning labs

Be Attentive

Be attentive while in the lab. Don't leave lit Bunsen burners unattended or leave an experiment in progress.

Be careful when handling hot glassware

Turn off all heating appliances when not in use. Keep flammable objects away from your workspace.

Keep a clean workspace

Don't obstruct work areas, floors, or exits. Keep coats, bags, and other personal items stored in designated areas away from the lab. Don't block sink drains with debris.

Handle glassware carefully

Properly dispose of anything that breaks. report cuts, spills, and broken glass to your instructor immediately.

Clean up

After completing the lab, carefully clear workspace and the equipment, and wash your hands.

Hazards In The Chemical Laboratory:

Hazards in the Chemical Laboratory S. G. Luxon, 1992 This is a revised and updated edition of a handbook of safety practices and measures for laboratories handling dangerous chemicals It covers recent changes in legislation precautionary safety methods new regulations and toxicity assessments *Improving Safety in the Chemical Laboratory* Jay A. Young, 1991-06-26 The work of accident prevention in the lab begins with foresight Discerning close calls near accidents early enough prevents them from turning into full fledged mishaps mishaps that cost time and money and which could result in injury *Improving Safety in the Chemical Laboratory* is an accident prevention handbook for the professional in the lab that shows how to detect and eliminate the causes of dangerous mishaps and virtually hazard proof any lab environment In unequivocally clear and practical terms *Improving Safety in the Chemical Laboratory* Second Edition offers detailed procedures from precautionary labeling to simulated drills safety inspections and the preparation of a chemical hygiene plan for the development of a safety enhanced workplace Reflecting in part the upgraded procedures now mandated by the OSHA Laboratory Standard in the USA as well as the WHMIS regulations in Canada and the COSHH regulations in the United Kingdom this newest edition offers unparalleled and up to date guidance on the fine points of hazard control with new added material on managing and handling especially hazardous substances and personal protective equipment The 95 percent solution the list of causes of laboratory accidents Hazard categories unsafe acts unsafe conditions Selecting and maintaining personal protective conditions Accident handling Classes of fuels and fires Preventing and extinguishing fires Toxic effects of chemicals Recognition of and treatment for exposure Chemical specific safety protocol Storage of lab chemicals Safe disposal of hazardous waste Personal protective equipment in the laboratory Improving hood performance Designing safety into new or renovated laboratories A comprehensive one volume safety seminar *Improving Safety in the Chemical Laboratory* will provide indispensable guidance to lab supervisors and workers teachers and students and anyone involved in the investigation of chemical accidents and injury In clear language that quickly details the full range of hidden and avoidable laboratory hazards *Improving Safety in the Chemical Laboratory* Second Edition offers the most up to date practical and easy to implement lab safety regimen yet available Hazards in the Chemical Laboratory G. D. Muir, 1980 Laboratory Safety for Chemistry Students Robert H. Hill, Jr., David C. Finster, 2011-09-21 this substantial and engaging text offers a wealth of practical in every sense of the word advice Every undergraduate laboratory and ideally every undergraduate chemist should have a copy of what is by some distance the best book I have seen on safety in the undergraduate laboratory Chemistry World March 2011 *Laboratory Safety for Chemistry Students* is uniquely designed to accompany students throughout their four year undergraduate education and beyond progressively teaching them the skills and knowledge they need to learn their science and stay safe while working in any lab This new principles based approach treats lab safety as a distinct essential discipline of chemistry enabling you to instill and sustain a culture of safety among students As students progress through

the text they'll learn about laboratory and chemical hazards about routes of exposure about ways to manage these hazards and about handling common laboratory emergencies Most importantly they'll learn that it is very possible to safely use hazardous chemicals in the laboratory by applying safety principles that prevent and minimize exposures Continuously Reinforces and Builds Safety Knowledge and Safety Culture Each of the book's eight chapters is organized into three tiers of sections with a variety of topics suited to beginning intermediate and advanced course levels This enables your students to gather relevant safety information as they advance in their lab work In some cases individual topics are presented more than once progressively building knowledge with new information that's appropriate at different levels A Better Easier Way to Teach and Learn Lab Safety We all know that safety is of the utmost importance however instructors continue to struggle with finding ways to incorporate safety into their curricula Laboratory Safety for Chemistry Students is the ideal solution Each section can be treated as a pre lab assignment enabling you to easily incorporate lab safety into all your lab courses without building in additional teaching time Sections begin with a preview a quote and a brief description of a laboratory incident that illustrates the importance of the topic References at the end of each section guide your students to the latest print and web resources Students will also find Chemical Connections that illustrate how chemical principles apply to laboratory safety and Special Topics that amplify certain sections by exploring additional relevant safety issues Visit the companion site at http://userpages.wittenberg.edu/dfinster/LSCS_Hazards_in_the_Chemical_Laboratory G.
