**Neurosurgery Notes For The Graduate Students (Penerbit USM)** Zamzuri Idris, Jafri Malin Abdullah, 2017 We dedicate this Neurosurgery Notes for the Graduate Students to all the residents and young neurosurgeons Some did read the books but could not grasp the important concepts or facts We have designed this e book electronic book in note format to provide a comprehensive yet easy to read summary of the essential topics in neurosurgery covering clinical localization basic neurosciences and neurosurgery itself The authors want to make this e book as an additional knowledge to the readers The purpose is to highlight the important points in neurosurgery Besides the real truth in some current neurosurgical practices are not clear therefore it is only a guide in note format to make readers quickly grasp the important or arguable points Some notes mentioned in this e book are indeed debateable and they may evolve over time Pertaining to aforementioned notes the content of this e book is largely gained from standard protocols or widely accepted practices our personal experience notes done during our neurosurgical training locally and overseas notes taken during international conferences notes obtained from our personal discussion with the seniors in neurosurgery from all over the world and notes made from current journals in neurosurgery In summary it is an electronic neurosurgical note book with

important and debateable knowledge that we would like to emphasize and share with neurosurgical trainees or any graduate students It is not meant to replace other commonly referred neurosurgical textbooks Therefore trainees and students should read this e book as an additional knowledge which could be subjected to further discussion We would like thank our beloved wives and our family members for being supportive and understanding our teachers for guiding us and our trainees for motivating us to write this e book Finally we would like to state some interesting quotes from others 1 The World is a book and those who do not travel only read a page Saint Augustine 354 430 2 The more you know the more you see and The brain actually is not like a single organ It s like a country there are many organs cities in it There are a vascular organ an endocrine organ an immunological organ and many more In real fact all are in the brain Professor Dr M Gazi Yasargil father of modern neurosurgery 3 You need fitness in all aspects brain mind spirit and body to explore optimally the beauty of the brain and nervous system Zamzuri Idris 2016      *Trauma* William C.
