Bredenkamp, Michele Gragnolati, World Bank. Europe and Central Asia Region. Human Development Department, America's Health Care Safety Net Institute of Medicine, Committee on the Changing Market, Managed Care, and the Future Viability of Safety Net Providers, 2000-08-04 America's Health Care Safety Net explains how competition and cost issues in today's health care marketplace are posing major challenges to continued access to care for America's poor and uninsured. At a time when policymakers and providers are urgently seeking guidance, the committee recommends concrete strategies for maintaining the viability of the safety net with innovative approaches to building public attention, developing better tools for tracking the problem, and designing effective interventions. This book examines the health care safety net from the perspectives of key providers and the populations they serve, including components of the safety net: public hospitals, community clinics, local health departments, and federal and state programs. Mounting pressures on the system, rising numbers of uninsured patients, decline in Medicaid eligibility due to welfare reform, increasing health care access barriers for minority and immigrant populations, and more. Specific consequences for providers and their patients from the competitive managed care environment, detailing the evolution and impact of Medicaid managed care. Key issues highlighted in four populations: children with special needs, people with serious mental illness, people with HIV/AIDS, and the homeless.

Equality, Participation and Inclusion 2 Jonathan Rix, Melanie Nind, Kieron Sheehy, Katy Simmons, John Parry, Rajni Kumrai, 2010-11-04 What are the experiences of children and young people? How can we think about the challenges they face? What systems and practices can support them? How can we develop greater equality, participation, and inclusion across diverse settings? This second edition of *Equality, Participation and Inclusion 2: Diverse Contexts* is the second of two Readers aimed at people with an interest in issues of equality, participation, and inclusion for children and young people. This second Reader focuses in particular upon the diverse experiences and contexts in which children and young people encounter issues of equality, participation, and inclusion. Comprising readings taken from the latest research in journal articles, newly commissioned chapters, as well as several chapters from the first edition that retain particular relevance, this fully updated second edition has broadened its focus to consider a wider range of diverse experiences and contexts whilst maintaining an emphasis on educational settings. Drawing on the writing of academics, practitioners, children, and young people, this collection is a rich source of information and ideas for students and practitioners who are interested in thinking about how inequality and exclusion are experienced and how they can be challenged, and will be of particular interest to those working in education, health, youth, and community work, youth justice, and social services. Families and advocates are also likely to be drawn to the material as much of it reflects on lived experiences and life stories. Essential Readings in Health Behavior: Theory and Practice Mark Edberg, 2009-07-01 **The Role of Nutrition in Maintaining Health in the Nation's Elderly** Institute of Medicine, Food and Nutrition Board, Committee on Nutrition Services for Medicare Beneficiaries, 2000-06-09 Malnutrition and obesity are both common among Americans over age 65. There are also a host of other medical conditions

from which older people and other Medicare beneficiaries suffer that could be improved with appropriate nutritional intervention. Despite that access to a nutrition professional is very limited, do nutrition services benefit older people in terms of morbidity, mortality, or quality of life? Which health professionals are best qualified to provide such services? What would be the cost to Medicare of such services? Would the cost be offset by reduced illness in this population? This book addresses these questions, provides recommendations for nutrition services for the elderly, and considers how the coverage policy should be approached and practiced. The book discusses the role of nutrition therapy in the management of a number of diseases. It also examines what the elderly receive in the way of nutrition services along the continuum of care settings and addresses the areas of expertise needed by health professionals to provide appropriate nutrition services and therapy.
