Health Care in Transition Richard A. Rettig, 1997 Rettig finds a growing demand for evidence based medicine

Hospital-Based Health Technology Assessment Laura Sampietro-Colom, Janet Martin, 2017-01-23 A timely work describing how localized hospital based health technology assessment HB HTA complements general arms length HTA agency efforts and what has been the collective global impact of HB HTA across the globe While HB HTA has gained significant momentum over the past few years expertise in the field and information on the operation and organization of HB HTA has been scattered This book serves to bring this information together to inform those who are currently working in the field of HTA at the hospital regional national or global level In addition this book is intended for decision makers and policy makers with a stake in determining the uptake and decommissioning of new and established technologies in the hospital setting HTA has traditionally been performed at the National Regional level by HTA Agencies typically linked to governments Yet hospitals are the main entry door for most health technologies HTs Hospital decision makers must undertake multiple high stakes investment and disinvestment decisions annually for innovative HTs usually without adequate information Despite the existence of arms length HTA Agencies inadequate information is available to hospital decision makers either because relevant HTA reports are not yet released at the time of entry of new technologies to the field or because even when the report exists the information contained is insufficient to clarify the contextualized informational needs of hospital decision makers Therefore there has recently been a rising trend toward hospital based HTA units and programs These units programs complement the work of National Regional HTA Agencies by providing the key and relevant evidence needed by hospital decision makers in their specific hospital context and within required decision making timelines The emergence of HB HTA is creating a comprehensive HTA ecosystem across health care levels which creates better bridges for knowledge translation through relevance and timeliness

Technology in American Health Care Alan B. Cohen, Ruth S. Hanft, 2004 Offers health care professionals vital information about risks benefits and costs of new medical technologies to help them make informed decisions

Oxford Handbook of Public Health Practice Ichiro Kawachi, Iain Lang, Walter Ricciardi, 2020 Fully revised and updated for the fourth edition the award winning Oxford Handbook of Public Health Practice remains the first resort for practitioners in the field Structured into practical sections addressed towards professional competencies and translating evidence into policy this Handbook provides concise summaries and covers real issues from across the globe providing a world of experience at your fingertips Easy to use concise and practical this Handbook is divided into seven parts that focus on the vital areas of this broad discipline Reflecting recent advances the most promising developments in the practice of public health are presented along with essential summaries of the core disciplines Specific sections are devoted to the development of professional competencies including negotiation communicating risk to the public community action and translating evidence into policy Written by an international team of experts and considering both social and scientific

advances since the previous edition this Handbook will assist students trainees and practitioners around the world with its enriched information on the management of disasters epidemics health behaviour acute and chronic disease prevention community and government action environmental health vulnerable populations and more

Redesigning the Medicare Contract Edward F. Lawlor, 2003-12-06 Recent debates on Medicare reform focus on prescription drug coverage expanding managed care choices or technical issues of payment policy Despite all the heat generated by these issues Edward F Lawlor's new book Redesigning the Medicare Contract demonstrates that fundamental questions of purpose and policy design for Medicare have been largely ignored Challenging conventional ideas Lawlor suggests that we look at Medicare as a contract between the federal government the program's beneficiaries and health care providers Medicare reform then would involve rewriting this contract so that it more successfully serves the interests of both beneficiaries and taxpayers To do this Lawlor argues that we must improve the agency of the program the informational organizational and incentive elements that assure Medicare program carries out beneficiary and taxpayer interests in providing the most appropriate high quality care possible The book includes a chapter devoted solely to concepts and applications that give definition to this brand of agency theory Lawlor's innovative agency approach is matched with lucid explanation of the more comprehensive groundwork in the history and politics of the Medicare program Lawlor's important and timely book reframes the Medicare debate in a productive manner and effectively analyzes alternatives for reform Lawlor argues that effective policy design for Medicare requires greater appreciation of the vulnerability of beneficiaries the complexity of the program itself its wide geographical variations in services and financing and the realistic possibilities for government and private sector roles Tackling difficult problems like end of life and high tech care and offering sensible solutions Redesigning the Medicare Contract will interest political scientists economists policy analysts and health care professionals alike

Managed Care and the Evaluation and Adoption of Emerging Medical Technologies Steven Garber, 2000 New medical technologies pharmaceuticals medical devices and procedures often allow great improvements in the outcomes of medical care but they are also widely believed to be a major cause of increasing costs Selective adoption of new technologies is crucial in the quest to control health care costs while preserving or enhancing the quality of care This report focuses on evaluation and adoption of innovative procedures and medical devices by managed care organizations MCOs The project had two primary objectives 1 to understand current MCO processes for making coverage medical necessity and payment decisions and how device developers and manufacturers prepare for and participate in these processes and 2 to identify ways that private voluntary action by the managed care and medical device industries might improve for the benefit of society these processes The core data are from confidential interviews with eight companies that develop and manufacture medical devices and medical directors of nine MCOs The findings should be of interest to medical device developers and manufacturers managed care organizations public policy makers and researchers and analysts A major impediment to socially appropriate adoption of emerging medical technologies

is limited information about the performance of these technologies in day to day medical practice The authors discuss prospects for improving four elements of information availability Developing better information before market introduction Learning more from experience after market introduction Evaluating and synthesizing clinical information Disseminating information They also discuss several other issues that warrant consideration Aligning private incentives of MCOs and payers with social values Enhancing MCO capabilities to evaluate technologies and make decisions Improving decisions by physicians Reducing use of inappropriate or obsolete technologies Reducing costs of decisionmaking for manufacturers and MCOs Improving manufacturer understanding of the market environment Helping MCOs and employers anticipate what is in the pipeline

Health Care Coverage Determinations: An International Comparative Study Jost, Timothy, 2004-12-01 A ground breaking set of case studies about how health care coverage decisions are made Robert A Berenson M D Senior Fellow at the Urban Institute Washington D C and former Director of the Center for Health Plans and Providers of the Medicare program Developed countries are facing rapidly rising health care costs and one of the major factors driving health care cost growth is the continual development and diffusion of new generally more expensive health care technologies This book contains A description of the institutions procedures and criteria used by eight countries for assessing technologies for public insurance coverage An analysis of the role of interest groups and of the public interest in these decision making processes An examination of how particular technologies are treated differently by different countries and why Based upon research from Australia Canada Germany The Netherlands Spain Switzerland the United States of America and the United Kingdom the contributors argue that although each of these countries is committed to evidence based scientific assessment of technologies in fact adoption of technologies is significantly affected by political considerations and in particular by the influence of interest groups Moreover it offers recommendations as to how technology assessment for coverage policy can be improved to serve better the public interest Health Care Coverage Determinations is essential reading for health policy makers managers researchers and students with an interest in health economics health care provision and the politics affecting health care legislation Contributors Liliana Bulfone Tanisha Carino Peter C Coyte Anna Garca Alts Colleen M Flood Stefan Gre Felix Gurtner Anthony Harris Timothy Stoltzfus Jost Eric Nauenberg Christopher Newdick Dea Niebuhr Guillaume Roduit Heinz Rothgang Frans F H Rutten Dominique Sprumont Juergen Wasem Public-private Policy Partnerships Pauline Vaillancourt Rosenau, 2000 The first book to evaluate public private partnerships in a broad range of policy areas

Epidemiology and the Delivery of Health Care Services Denise M. Oleske, 2007-05-08 In the previous edition of this book the predominant theme was applying epidemiology to assist managers in dealing with an environment in which the structure of health care financing was rapidly changing to managed care and in which there was increasing competition among health care providers While these phenomena continue to exist new challenges have emerged and in particular the explosion of information technology has given way to a global society and decision making that is increasingly shared with consumers

because of their access to the same sets of data Thus the questions with which health care managers are confronted on a daily basis are now exceedingly more complex 1 How can a population be defined considering that both exposures and diseases originating in one corner of the globe can rapidly become a threat to any nation s security 2 Where do influences on a population begin and end 3 How can we protect and promote health in that population or any population if privacy is preeminent This edition brings in this editor s view of the increasing need for health care managers be they in private or public settings to use epidemiological concepts and methods The challenges posed by health care delivery in the 21st century are immense ranging from redefining life and health given the advances in genetic technology global environmental changes and multinational simultaneous increases in poverty and longevity to economic decisions regarding technology and service levels that fewer and fewer can afford

The Bionic Human Frank E Johnson, Katherine S. Virgo, 2007-11-09 An integrated survey of best practices for the management of patients with implanted prosthetic devices and an insightful examination of the epidemiological societal and policy issues associated with their use The devices covered range from breast penile vascular and joint prostheses to cochlear ossicular and dental implants and include cerebrospinal fluid shunts cardiac valves stents and pacemakers For each device the authors consider its pros and cons detail the best current strategies to keep implanted patients healthy and evaluate the latest and most promising new diagnostic tests Clinical counterpoints from distinguished authorities at major centers in the United States and Europe are offered throughout Follow up recommendations are summarized in a standardized format that allows comparative analysis and lays the foundation for controlled clinical trials and the eventual establishment of evidence based guidelines

Mental Health Care Administration Paul Rodenhauser, 2000 A comprehensive and current guide to the administration of mental health care services

Mammography and Beyond National Research Council, Division on Earth and Life Studies, Institute of Medicine, National Cancer Policy Board, Committee on Technologies for the Early Detection of Breast Cancer, 2001-08-23 Each year more than 180 000 new cases of breast cancer are diagnosed in women in the U S If cancer is detected when small and local treatment options are less dangerous intrusive and costly and more likely to lead to a cure Yet those simple facts belie the complexity of developing and disseminating acceptable techniques for breast cancer diagnosis Even the most exciting new technologies remain clouded with uncertainty Mammography and Beyond provides a comprehensive and up to date perspective on the state of breast cancer screening and diagnosis and recommends steps for developing the most reliable breast cancer detection methods possible This book reviews the dramatic expansion of breast cancer awareness and screening examining the capabilities and limitations of current and emerging technologies for breast cancer detection and their effectiveness at actually reducing deaths The committee discusses issues including national policy toward breast cancer detection roles of public and private agencies problems in determining the success of a technique availability of detection methods to specific populations of women women s experience during the detection process cost benefit analyses and more Examining current

practices and specifying research and other needs Mammography and Beyond will be an indispensable resource to policy makers public health officials medical practitioners researchers women s health advocates and concerned women and their families

Conflict of Interest in Medical Research, Education, and Practice Institute of Medicine,Board on Health Sciences Policy,Committee on Conflict of Interest in Medical Research, Education, and Practice,2009-10-16 Collaborations of physicians and researchers with industry can provide valuable benefits to society particularly in the translation of basic scientific discoveries to new therapies and products Recent reports and news stories have however documented disturbing examples of relationships and practices that put at risk the integrity of medical research the objectivity of professional education the quality of patient care the soundness of clinical practice guidelines and the public s trust in medicine Conflict of Interest in Medical Research Education and Practice provides a comprehensive look at conflict of interest in medicine It offers principles to inform the design of policies to identify limit and manage conflicts of interest without damaging constructive collaboration with industry It calls for both short term actions and long term commitments by institutions and individuals including leaders of academic medical centers professional societies patient advocacy groups government agencies and drug device and pharmaceutical companies Failure of the medical community to take convincing action on conflicts of interest invites additional legislative or regulatory measures that may be overly broad or unduly burdensome Conflict of Interest in Medical Research Education and Practice makes several recommendations for strengthening conflict of interest policies and curbing relationships that create risks with little benefit The book will serve as an invaluable resource for individuals and organizations committed to high ethical standards in all realms of medicine

False Hope Richard A. Rettig,Peter D. Jacobson,Cynthia M. Farquhar M.D.,Wade M. Aubry M.D.,2007-01-25 In the late 1980s a promising new treatment for breast cancer emerged high dose chemotherapy with autologous bone marrow transplantation or HDC ABMT By the 1990s it had burst upon the oncology scene and disseminated rapidly before having been carefully evaluated By the time published studies showed that the procedure was ineffective more than 30 000 women had received the treatment shortening their lives and adding to their suffering This book tells of the rise and demise of HDC ABMT for metastatic and early stage breast cancer and fully explores the story s implications which go well beyond the immediate procedure and beyond breast cancer to how we in the United States evaluate other medical procedures especially life saving ones
