Collective Dismissal in the European Union: A Comparative Analysis Roberto Cosio, Filippo Curcuruto, 2016-04-24 When business imperatives require large enterprises to reorganize involving the reduction in staff legally characterized as collective dismissal EU directives and laws across Europe mandate specific procedures to support workers who have been made redundant and impose sanctions where regulatory or judicial scrutiny uncovers violations It is thus essential that a clearly defined framework of the laws and jurisprudence in force in each Member State be provided for businesses and their counsel to ensure compliance and avoid sanctions This eminently practical book the first and only book of its kind provides exactly such an analysis The book is structured on a country by country basis with each chapter written by an expert in the country covered and responding concisely to such questions as the following How is collective dismissal calculated Which issues regarding collective layoffs procedures trigger legal intervention What happens when enterprises provide incomplete or delayed information to labour unions or public officials When can a worker be reinstated or claim compensation Each chapter clarifies the extent to which directives have been implemented in the Member States and whether the law in force provides workers with some more favourable treatments than EU actually requires Jurisprudence and its practical application are analysed from the perspective of the law in action rather than that of the law in the books A concluding chapter examines global standards and trends in this area of law There is no other publication fully devoted to the subject of collective dismissal extensively elaborated and supported with case law As a source of reliable information as manifested in the actions of judges lawyers solicitors firms and labour unions this book has no peers It will be welcomed and

put to use by lawyers and solicitors specializing in labour law in house counsel and human resources professionals at multinational companies regulatory authorities and labour unions as well as by universities and centres of research in the field of European law and labour law The editors Roberto Cosio Filippo Curcuruto Vincenzo Di Cerbo and Giovanni Mammone all have extensive experience in judicial and administrative practice related to EU labour law particularly in Italy All are well known authors in this field

Vulnerability and the Legal Organization of Work Martha Albertson Fineman, Jonathan W. Fineman, 2017-07-06 This book uses the concepts of vulnerability and resilience to analyze the situation of individuals and institutions in the context of the employment relationship It is based on the premise that both employer and employee are vulnerable to various social economic and political forces although differently so It demonstrates how in responding to those complementary institutional relationships of employer and employee the state unequally and inequitably favors employers over employees Several chapters included in this collection also consider how the state shapes creates and maintains through law the social identities of employer and employee and how that legal regime operates as the allocation of power and privilege This unique and fundamental role of the state in defining the employment relationship profoundly affects the respective abilities and degree of resiliency of actual employers and employees Other chapters explore how attention to the respective vulnerability and resilience of those who do and those who direct work in assessing the employment relationship can raise fundamental questions of social justice and suggest new avenues for critical engagement with labor and employment law Collectively these pieces articulate a framework for imaging what would constitute an appropriately Responsive State in the employment

context and how those interested in social justice might begin to use the concepts of vulnerability and resilience in their arguments

Resources in Education ,1990 *1968 Annual Supplement* John B. Simeone, Alfred de Grazia, Carl E. Martinson, 2013-12-01 Employment : the Focus of Collective Bargaining in Europe ,2001

The insertion in June 1997 of a Title on employment in the Treaty on European Union has accelerated the drafting of European policy in this field over the last few years This European dynamic has had widespread impact on the themes and mechanisms that characterise national systems of industrial relations On the one hand employment is increasingly governed by rules negotiated between the social partners and depending on the circumstances the State This phenomenon of joint labour market regulation is confirmed by a marked desire on the part of employers associations and trade unions to integrate employment related issues into their actions and negotiations On the other hand the incorporation of employment related themes by employers associations and trade unions usually in concertation with government policies is related with greater coordination of bargaining and concertation mechanisms established at European level and within each Member State Today the various national realities appear to be directed to various degrees by these two general tendencies These phenomena active in the field of employment bargaining must therefore be analysed on three counts the first focuses on the development of the coordination mechanisms that structure these negotiations and more specifically raises the issue of co responsibility for the labour market the second deals with the strict content of employment bargaining and examines the question of negotiated flexibility of working conditions and employment the third addresses the autonomy of collective bargaining in Europe This analysis informs our research which is in turn intimately linked to recent changes taking place in national systems of industrial relations
