## Health And Illness Trans German:

**Health, Disease, and Illness** Arthur L. Caplan, James J. McCartney, Dominic A. Sisti, 2004-06-17 In the 1850s Drapetomania was the medical term for a disease found among black slaves in the United States The main symptom was a strange desire to run away from their masters In earlier centuries gout was understood as a metabolic disease of the affluent so much so that it became a badge of uppercrust honor and a medical excuse to avoid hard work Today is there such a thing as mental illness or is mental illness just a myth Is Alzheimer's really a disease What is menopause a biological or a social construction Historically one can see that health disease and illness are concepts that have been ever fluid Modern science sociology philosophy even society among other factors constantly have these issues under microscopes learning more defining and redefining ever more exactly Yet often that scrutiny instead of leading toward hard answers only leads to more questions Health Disease and Illness brings together a sterling list of classic and contemporary thinkers to examine the history state and future of ever changing concepts in medicine Divided into four parts Historical Discussions Characterizing Health Disease and Illness Clinical Applications of Health and Disease and Normalcy Genetic Disease and Enhancement The Future of the Concepts of Health and Disease the reader can see the evolutionary arc of medical concepts from the Greek physician Galen of Pergamum ca 150 ce who proposed that the best doctor is also a philosopher to contemporary discussions of the genome and morality The editors have recognized a crucial need for a deeper integration of medicine and philosophy with each other particularly in an age of dynamically changing medical science and what it means medically philosophically to be human

*(De-)Professionalization in Nursing* Jette Lange, 2024-05-06 The nursing process generally is understood as key element of professional nursing care in Germany This study follows this argument back to the introduction of the nursing process in the 1970s and 1980s At that time the German healthcare system underwent dramatic changes and economic reorganization which can be understood as the emergence of the neoliberal rationale in Germany The argument of cost explosion was used to restructure hospitals into enterprises that were to operate based on the logic of the market Its cybernetic logic made the nursing process an ideal instrument to restructure nursing care Perspectives of governmentality and critical accounting reveal the nursing process as an accounting tool which has made nursing calculable And while German nurses valued its potential for professionalization the findings suggest that a newly constituted accountable nursing vocation can instead be considered as de professionalizing
