Bettinger, 2009-12-31 Within the last three decades foraging theory has established itself as a major arguably the dominant cornerstone for both archaeological and ethnographic hunter gatherer research Until now however no introductory treatment has presented the subject in a form that was quantitatively explicit and yet easy to follow Designed as an introduction to undergraduate and graduate students new to the subject and as a refresher for professionals seeking to broaden their command *Hunter Gatherer Foraging Five Simple Models* presents the five foraging models that lend themselves best to hunter gatherer application diet breadth linear programming front versus back loaded resources technological investment and field processing Each chapter begins with a hypothetical hunter gatherer problem and takes the reader through the steps needed to state such problems in quantitative form and solve them Exercises with answers at the end of each chapter reinforce key concepts and methodology From the reviews A fine volume that does just what it claims to The style is informal often humorous and it will clearly work well in a classroom of advanced undergraduates or graduate students The flow and clarity of the discussions almost makes one forget that this is math that they're trying to master Anyone with a serious interest in hunter gatherers prehistoric subsistence and resource provisioning will want to own a copy Mark E Basgall in *Journal of California and Great Basin Anthropology* This book is the first of its kind to provide a suite of tools applicable to many ethnographic and archaeological foraging problems Anyone involved in human behavioral ecology should work through this book It is certainly required reading for any student of the discipline and as it finds its way into the classroom and onto the desks of practitioners it is sure to become a classic Brian F Codding in *California Archaeology* An excellent primer on a group of models that played an important role in the development of hunter gatherer and ecological studies in anthropology The examples sample problems and touch of humor as the models are explained make the book ideal

for use with either advanced undergraduates graduate students or for anyone wishing for a quick reminder of the math behind the models Susan K Harris in *American Antiquity* A laboratory manual to teach mathematical models to people interested in Optimal Foraging Theory T he book will be useful for graduate seminars to teach details of how foraging societies maximize returns in manipulating the variability in resources of their exploitation territories Andrew B Smith in *Journal of Human Evolution* T his small book could be used well as an adjunct or ancillary text for a n umber of different courses in quantitative methods hunter gatherers or foraging economy I t succeeds overall very well and very nicely in what it aims to do Robert Whallon in *Journal of Anthropological Research* This book would make an excellent accompaniment to many anthropology and archaeology courses both at high school and college levels There is a lot of well written material crammed into this little book I highly recommend it for anyone interested not only directly with hunter gatherer research but for anyone who wonders how we know what we think we know about ancient day to day life Ira R Wishoff in *The Dirt Brothers* <http://dirtbrothers.org> Prepublication praise This volume presents exercises designed to convey foraging models in a hands on manner An excellent resource for upper division undergraduate and graduate level classes focused on topics ranging from analytical models in anthropology archaeology to hunter gatherers Gary M Feinman *The Field Museum* Anyone who has tried to teach students the various models used in behavioral ecology will find this book a welcome relief Written by an authority who understands both theory and application the book s examples and exercises show the models potentials and limitations As a step by step guide it is an indispensable supplement to a variety of classes Robert L Kelly University of Wyoming A compact consistently informative and exemplary primer for beginners and experts alike Bettinger s inviting and lucid style multiple examples and transparent math will make this short book an instant classic the well worn companion of anyone interested in prehistoric subsistence and lifeways Bruce Winterhalder University of California Davis

Cellarmasters in the Kitchen Wendy Toerien, 2012-12-11 *The Cape Winemakers*

Guild CWG founded in 1982 and celebrating its 30th anniversary in 2012 is an association of South Africa's top winemakers committed to maintaining and constantly improving the quality of their wines thereby serving as role models for the Cape wine industry as a whole to uphold and build on the reputation of South African wine globally. This coffee table book primarily focuses on the winemakers and their thoughts, opinions and philosophies on all things to do with wine from the growing making and enjoyment of it to its integral role past, present and future in the culture and lifestyle of the Cape and South Africa. Beautifully written by Wendy Toerien, the text is both lighthearted and entertaining as well as evocative and informative. Each of the 45 Guild members is featured in a profile piece that includes anecdotes, insights and experiences of a life with food and wine. Also included are two of each winemaker's favourite recipes matched with one or more of his or her top wines. Sections dealing with the history of the CWG, interwoven with its role in leading Cape wine industry developments and initiatives, the workings of the CWG and its members, the philosophy of the traditional role of a guild as a touchstone for artisanal excellence and the activities of the CWG including the annual internationally prestigious auction of selected members' wines and social responsibility programmes such as the Development Trust to mentor new young winemakers from previously disadvantaged backgrounds and school funding are another feature of this celebration of the Guild and its members.

Biltong Hunting as a Performance of Belonging in Post-Apartheid South Africa, Andre Goodrich, 2015-03-18. Since the early 1990s the seventeen fold growth in South African sport hunting has made the South African wildlife ranching industry the sixth largest contributor to South Africa's agricultural sector bringing in 680 million per annum. Biltong Hunting as a Performance of Belonging in Post Apartheid South Africa links biltong hunting's rapid growth to the 1990s disassembly of the apartheid state and analyzes how the hierarchy and belonging that biltong hunters associate with it emerges anew in the post apartheid context. It examines the narrative and embodied strategies employed by hunters and farmers to create a space that naturalizes the mythic Afrikaner nationalist past in the post apartheid present.
