Department of Health, Education and Welfare United States. Department of Health, Education, and Welfare, 1979 *Head Start Social Services* Gary Lacy, 2014-01-21 First published in 1999 Project Head Start a federal child development program for low income families serves both the mother and her children Previous studies have emphasized Head Start s influence on the child in terms of cognitive gains social development and social emotional development A continuing problem to understanding the extent of Head Start impact on families is the absence of reliable information about Head Start s influence on the mother and how that influence transfers to the family as they work toward self sufficiency This study investigated two issues 1 the experiences perceptions and levels of involvement of mothers who participate in Head Start social services and 2 how these mothers describe their benefits and relate these benefits to family experiences such as increased problem solving coping and parenting skills *Monthly Catalog of United States Government Publications* , Federal Register , 1979-09 Monthly Catalogue, United States Public Documents , 1979 **The Social Sciences Go to Washington** Hamilton Cravens, 2004 What happens when the allegedly value free social sciences enter the national political arena In *The Social Sciences Go to Washington* scholars examine the effects of the massive influx of sociologists demographers economists educators and others to the federal advisory process in the postwar period Essays look at how these social scientists sought to change existing policies in welfare public health urban policy national defense environmental policy and science and technology policy and the ways they tried to influence future policies Policymakers have been troubled that followers of postmodernism have questioned the legitimacy of scientific and political authority to speak for the desires of social groups As the social sciences increasingly become expressions of individual preferences the contributors ask how can they continue to be used to set public policy for us all This collection is a useful resource for anyone studying the relationship between science and the government in the postwar years Monthly Catalog of United States Government Publications United States.
