Hobday,2000-02-01 The human race evolved under the sun and for thousands of years lived in harmony with its heat and light Yet over the last fifty years we have lost this close contact with the sun and its healing powers We have become afraid of it However the sun is central to our well being and health Did you know that designing and building sunlit houses can help prevent disease make us feel happier and save energy sunlight can help prevent and heal many common and often fatal diseases like breast cancer heart disease multiple sclerosis and osteoporosis before antibiotics sunlight was used successfully to speed up the healing of wounds tanning moderately throughout the year is better than avoiding the sun altogether sudden bursts of strong solar radiation are unnatural and dangerous protection needs to be built up slowly early morning sunlight in cool temperatures is particularly beneficial to the body sunlit hospital rooms provide a better environment for the treatment of clinically depressed people prolonged exposure to artificial light puts the body under great stress large numbers of people may be compromising their health through sunlight deficiency there is a substantial body of historical and contemporary evidence that suggests moderate sunbathing is far more beneficial than we are currently led to believe The light and heat from the sun are indispensable to all nature Humanity is also part of nature and needs sunlight for health and well being for vitality and happiness This book explains how and why we should welcome sunlight back into our lives safely It shows how sunlight was used to prevent and cure diseases in the past and how it can heal us and help us in the future Richard Hobday MSc PhD is a member of the British Register of Complementary Practitioners and has studied traditional Chinese Medicine and Chinese exercise systems in China Dr Hobday has many years experience of solar design in buildings and is a leading authority on the history of sunlight therapy

Spf Zero Don, Mamie Swiger K L, Ph D Ph D Dr Don, 2011-05-15. Designed as sunburn prevention chemical sunscreen has become an overused everyday product. The problem is sunscreen chemicals are endocrine disruptors, mutagens, and carcinogens; they block vitamin D production, kill coral reefs, and transform male fish to female. A study of the 500 most popular chemical sunscreen products found that nearly half may actually cause skin cancer and nearly all 461 out of 500 chemical sunscreen products were actually unsafe to use. None of the chemical sunscreen products prevent skin cancer. In short, the overuse of chemical sunscreen is pandemic and is contributing to many deficiency diseases affecting large populations across many countries. Today the chemical sunscreen industry easily pulls in 5 billion a year. Chemical sunscreen SPF Sunburn Prevention Factor is found in suntan lotion, lip balm, lipstick, facial creams, body lotion, shampoos, and yes even night creams. To turn an occasional use product into a daily use product, cosmetic companies fabricated a state of fear known as Sun Scare. You don't have to avoid the sun or sunbeds; just avoid sunburn. SPF Zero proves nature got it right; you need sunshine like you need food, air, and water.
