## **Health And Food:**

**Food, Medicine, and the Quest for Good Health** Nancy N. Chen, 2008-12-15 What we eat how we eat where we eat and when we eat are deeply embedded cultural practices Eating is also related to how we medicate The multimillion dollar diet industry offers advice on how to eat for a better body and longer life and avoiding harmful foods or choosing healthy ones is considered separate from consuming medicine another multimillion dollar industry In contrast most traditional medical systems view food as inseparable from medicine and regard medicinal foods as the front line of healing Drawing on medical texts and food therapy practices from around the world and throughout history Nancy N Chen locates old and new crossovers between food and medicine in different social and cultural contexts The consumption of spices sugar and salt was once linked to specific healing properties and trade in these commodities transformed not just the political economy of Europe Asia and the New World but local tastes and food practices as well Today s technologies are rapidly changing traditional attitudes toward food enabling the cultivation of new admixtures such as nutraceuticals and genetically modified food that link food to medicine in novel ways Chen considers these developments against the evolving food regimes of the diet industry in order to build a framework for understanding diet as individual practice social prescription and political formation

**Health, Food and Social Inequality** Carolyn Mahoney, 2015-02-20 Health Food and Social Inequality investigates how vast amounts of consumer data are used by the food industry to enable the social ranking of products food outlets and consumers themselves and how this influences food consumption patterns This book supplies a fresh social scientific perspective on the health consequences of poor diet Shifting the focus from individual behaviour to the food supply and the way it is developed and marketed it discusses what is known about the shaping of food behaviours by both social theory and psychology Exploring how knowledge of social identities and health beliefs and behaviours are used by the food industry Health Food and Social Inequality outlines for example how commercial marketing firms supply food companies with information on where to locate snack and fast foods whilst also advising governments on where to site health services for those consuming such foods disproportionately Giving a sociological underpinning to Nudge theory while simultaneously critiquing it in the context of diet and health this book explores how social class is an often overlooked factor mediating both individual dietary practice and food marketing strategies This innovative volume provides a detailed critique of marketing and food industry practices and places class at the centre of diet and health It is suitable for scholars in the social sciences public health and marketing

**Natural Forms of Defense Against Biological, Chemical and Nuclear Threats** John Brighton,2007-02-26 The events that took place on September 11th caused Dr John Brighton a naturopathic health consultant to ask himself questions about what role natural forms of healing might have in a scenario involving weapons of mass destruction WMD As he examined the issues and the nature of the threat he felt assured that a naturalistic approach could make a significant contribution in conjunction with that offered by conventional medicine Moreover he felt that to use both would provide a more powerful deterrent than if

either were used alone The naturalistic approach would augment the use of drugs by adding 5 extra lines of defense aimed at supporting and strengthening the immune system to deal with such a dire event These lines include A psychological dimension A social dimension A preventative dimension An environmental dimension A specific dimension The whole idea of this holistic strategy is to employ prevention and immune enhancing factors in order to reduce the level of crisis to begin with As a result the dependency on antibiotics there are no effective antivirals and other valuable medical resources can be considerably reduced and most importantly preserved for when they would be needed most Another benefit of integrating these two systems would add what Dr Brighton calls synergistic complexity as a way to reduce the current crisis of germ resistance to many most potent antibiotics and to provide a holistic approach to all forms of WMD The book clarifies the scope of the threat we face by examining The variety of biological chemical and nuclear threats The factors involved in the creation of WMD The uncanny capacity of microbes to develop resistance to our medications The threat of bioengineering and the creation of superbugs How synergistic complexity could provide a possible solution A chapter is dedicated to focusing on the specific nature and challenges posed by each biological chemical and nuclear agent This includes A description of the agent How it causes harm How it might be used as a weapon and the possibility of it being used How it is detected diagnostically and in the field The conventional method of care and treatment The suggested natural forms of defense including herbs vitamins minerals and other natural substances and healing therapies The book ends with a forward looking chapter on emerging technologies that have promise of increasing our level of defense against WMD A bibliography and a full section on resources are available
