**Biological and Health Effects from Exposure to Power-line Frequency Electromagnetic Fields** Hiraku Takebe,2001 The possible health effects of electro magnetic EMF from high voltage electric power lines have been discussed since the 1970s The concern was triggered by epidemiological studies in the United States and Europe that suggested a slightly increased incidence of leukaemia s and brain tumours occurred among those living and working near high voltage power lines Although studies can indicate an associate between factor and effect the studies themselves cannot confirm a cause effect relationship Whether EMF is producing these ill effects must be confirmed by experimental studies      **Electromagnetic**
