Inigo Jones and the European Classicist Tradition Giles Worsley, 2007 An examination of Inigo Jones's work within the context of the European early seventeenth century classicist movement Includes a broad survey of contemporary architecture in Italy Germany France and the Netherlands as well as a close examination of Jones's buildings *The Beautiful Augsburg*, 1929 , *Art Books* Wolfgang M. Freitag, 2013-10-28 First published in 1997 For this second edition of Art Books A Basic Bibliography of Monographs on Artists the vast number of new books published since 1985 was surveyed and evaluated This has resulted in the selection of 3 395 additional titles These selections reflective of the increase in the monographic literature on artists during the last ten years are evidence of the activities of a larger number of art historians in more countries worldwide of the increasingly diverse and ambitious exhibition programs of museums whose number has also increased dramatically and also of a lively international art market and the attendant gallery activities The selections of the first edition have been reviewed errors have been corrected and important new editions and reprints have been noted The second edition contains 278 names of artists not represented in the first edition *A History of Western Architecture* David Watkin, 2005 The history of Western architecture from the earliest times in Mesopotamia and Egypt to the dramatic impact of CAD on architectural practice at the beginning of the 21st century **Augsburg During the Reformation Era** B. Ann Tlusty, 2012-09-15 Sixteenth century Augsburg comes to life in this beautifully chosen and elegantly translated selection of original documents Ranging across the whole panoply of social activity from the legislative reformation to work recreation and family life these extracts make plain the subtle system of checks and balances violence and self regulation that brought order and vibrancy to a sophisticated city community Most of all we hear sixteenth century people speak in their petitions and complaints their nervous responses under interrogation their rage and laughter Tlusty has done an invaluable service in crafting a collection that should be an indispensable part of the teaching syllabus Andrew Pettegree University of St Andrews

History of Construction Cultures Volume 2 João Mascarenhas-Mateus, Ana Paula Pires, 2021-07-08 Volume 2 of History of Construction Cultures contains papers presented at the 7ICCH Seventh International Congress on Construction History held at the Lisbon School of Architecture Portugal from 12 to 16 July 2021 The conference has been organized by the Lisbon School of Architecture FAUL NOVA School of Social Sciences and Humanities the Portuguese Society for Construction History Studies and the University of the Azores The contributions cover the wide interdisciplinary spectrum of Construction History and consist on the most recent advances in theory and practical case studies analysis following themes such as epistemological issues building actors building materials building machines tools and equipment construction processes building services and techniques structural theory and analysis political social and economic aspects knowledge transfer and cultural translation of construction cultures Furthermore papers presented at thematic sessions aim at covering important problematics historical periods and different regions of the globe opening new directions for Construction History research

We are what we build and how we build thus the study of Construction History is now more than ever at the centre of current debates as to the shape of a sustainable future for humankind Therefore History of Construction Cultures is a critical and indispensable work to expand our understanding of the ways in which everyday building activities have been perceived and experienced in different cultures from ancient times to our century and all over the world **Physical Models** Bill

Addis,Karl-Eugen Kurrer,Werner Lorenz,2020-09-25 Physical models have been and continue to be used by engineers when faced with unprecedented challenges when engineering science has been inadequate or even non existent and in any other situation when engineers have needed to raise their confidence in a design proposal to a sufficient level in order to begin construction For this reason models have mostly been used by designers and constructors of highly innovative projects when previous experience has not been available The book covers the history of using physical models in the design and development of civil and building engineering projects including Robert Stephenson s Britannia Bridge in the 1840s the masonry Aswan Dam in the 1890s and the Boulder Dam in the 1930s tidal flow in estuaries and wind and seismic loads on structures from the 1890s the acoustics of concert halls and the design of thin concrete shell roofs from the 1920s and the dynamic behaviour of tall buildings from the 1930s as well as and cable net and membrane structures in the 1960s Individual designers featured include Eduardo Torroja Pier Luigi Nervi Heinz Hossdorf Heinz Isler Frei Otto Sergio Musmeci and Mamoru Kawaguchi The book concludes with overviews of the current use of physical models alongside computer models for example in boundary layer wind tunnels seismic engineering hydrology soil mechanics and air flow in buildings Traditionally progress in engineering has been attributed to the creation and use of engineering science the understanding of materials properties and the development of new construction methods The book argues that the use of reduced scale models has played an equally important part in the development of civil and building engineering However like the history of engineering design itself this crucial contribution has not been widely reported or celebrated The book includes 39 chapters written by 29 authors from ten different countries **A Companion to Late Medieval and Early Modern Augsburg** ,2020-02-25 A

Companion to Late Medieval and Early Modern Augsburg introduces readers to major political social and economic developments in Augsburg from c 1400 to c 1800 as well as to those themes of social and cultural history that have made research on this imperial city especially fruitful and stimulating The volume comprises contributions by an international team of 23 scholars providing a range of the most significant scholarly approaches to Augsburg s past from a variety of perspectives disciplines and methodologies Building on the impressive number of recent innovative studies on this large and prosperous early modern city the contributions distill the extraordinary range and creativity of recent scholarship on Augsburg into a handbook format Contributors are Victoria Bartels Katy Bond Christopher W Close Allyson Creasman Regina Dauser Dietrich Erben Alexander J Fisher Andreas Flursch tz da Cruz Helmut Graser Mark H berlein Michele Zelinsky Hanson Peter Kreutz Hans J rg K nast Margaret Lewis Andrew Morrall Marjorie Elizabeth Plummer Barbara Rajkay Reinhold

Edward Chaney, Timothy Wilks, 2013-12-13 Although the eighteenth century is traditionally seen as the age of the Grand Tour it was in fact the continental travel of Jacobean noblemen which really constituted the beginning of the Tour as an institutionalized phenomenon James I's peace treaty with Spain in 1604 rendered travel to Catholic Europe both safer and more respectable than it had been under the Tudors and opened up the continent to a new generation of aristocratic explorers enquirers and adventurers This book examines the political and cultural significance of the encounters that resulted focusing in particular on two of England's greatest and newly united families the Cecils and the Howards It also considers the ways in which Protestants and Catholics experienced the aesthetic and intellectual stimulus of European travel and how the cultural experiences of the travellers formed the essential ingredients in what became the Grand Tour
