Elliott Coues, the Naturalist as Historian of the American West Michael J. Brodhead, 1967 Martha Maxwell, Rocky Mountain Naturalist Maxine Benson, 1999-01-01 See there she is cried one visitor to the Centennial Exposition. Just think, she killed all them animals, echoed another. There that's her. All during the hot Philadelphia summer of 1876, throngs of people pushed and shoved their way into the Kansas Colorado Building, eager to catch a glimpse of the small, dark-haired woman responsible for creating the extraordinary display of bears, deer and other mammals cavorting over a Rocky Mountain landscape. Curious, skeptical, friendly, on and on they came until the policemen stationed at the doors were hard pressed to maintain control. The fairgoers were intent on seeing for themselves the modern Diana who had come all the way from the wilds of Colorado. Maxine Benson's finely crafted biography of Martha Maxwell illuminates the little-known but important career of a remarkable woman: Naturalist, taxidermist, museologist, artist. Maxwell pioneered in a number of fields new for women. Born in Pennsylvania in 1831 and educated in the Midwest, she traveled to the gold fields of Colorado with her husband in 1860. A chance encounter with a German taxidermist determined her lifework, and Maxwell soon devoted her boundless energy to hunting and mounting all forms of Rocky Mountain wildlife, which she displayed in unusual habitat settings in her museum in Boulder and later in Denver. Her spreading fame led to an invitation to exhibit her collection at the Philadelphia Centennial Exposition, where she achieved international renown. As Maxwell's major scientific and artistic contributions to natural history, taxidermy and display were recognized, her influence carried to the Smithsonian Institution. Separated from her husband and alienated from her daughter, however, she became increasingly unhappy as her professional accomplishments grew. Her tragic and lonely death in 1881 revealed something of the price she paid for daring to be different. Like that of other accomplished women of her era, Maxwell's fame did not keep pace with the significant influence she had on her profession. Thanks to Maxine Benson, Martha Maxwell now takes her rightful place in the history of the West.

Swallow Angela Turner, 2015-11-15 Known as heralds of spring and beautiful elegant flyers swallows are among the most beloved of familiar birds Because they return with the spring swallows as Angela Turner explains have long been associated with the renewal of life love fidelity and fertility while their ability to travel incredible distances has given them associations with freedom and speed That freedom however hasn't kept them from becoming familiar figures in towns and cities They often seem to even seek out human company for example barn swallows are known for nesting in our buildings and purple martins in our back yards Destruction of their natural habitat however has proved dangerous to some species of swallow and recent years have seen some populations dwindling to the point of near extinction Turner outlines the reasons for these declines as part of her engaging account of the natural and cultural history of this beloved bird

Biologists and the Promise of American Life Philip J. Pauly, 2018-06-05 Explorers evolutionists eugenicists sexologists and high school biology teachers all have contributed to the prominence of the biological sciences in American life In this book Philip Pauly weaves their stories together into a fascinating history of biology in America over the last two hundred years Beginning with the return of the Lewis and Clark expedition in 1806 botanists and zoologists identified science with national culture linking their work to continental imperialism and the creation of an industrial republic Pauly examines this nineteenth century movement in local scientific communities with national reach the partnership of Asa Gray and Louis Agassiz at Harvard University the excitement of work at the Smithsonian Institution and the Geological Survey and disputes at the Agriculture Department over the continent's future He then describes the establishment of biology as an

academic discipline in the late nineteenth century and the retreat of life scientists from the problems of American nature The early twentieth century however witnessed a new burst of public oriented activity among biologists Here Pauly chronicles such topics as the introduction of biology into high school curricula the efforts of eugenicists to alter the breeding of Americans and the influence of sexual biology on Americans most private lives Throughout much of American history Pauly argues life scientists linked their study of nature with a desire to culture to use intelligence and craft to improve American plants animals and humans They often disagreed and frequently overreached but they sought to build a nation whose people would be prosperous humane secular and liberal Life scientists were significant participants in efforts to realize what Progressive Era oracle Herbert Croly called the promise of American life Pauly tells their story in its entirety and explains why now in a society that is rapidly returning to a complex ethnic mix similar to the one that existed for a hundred years prior to the Cold War it is important to reconnect with the progressive creators of American secular culture [National Library of Medicine Current Catalog](#) National Library of Medicine (U.S.),1982 [Explorations Into the World of Lewis and Clark V-3 of 3](#) Robert A.
